Ford Restoration Parts

Ford Trademarks & Trade Dress Used
Under License to Carpenter Industries

Made Right, Fits Right & Last Longer

All of the parts in this catalog, with the exception of new old stock Ford parts, are reproduction or equivalent replacement type parts of Ford Motor Company parts and are represented or referenced by original Ford part numbers.

Reproduction Ford parts made from obsolete Ford tooling that are licensed by but not manufactured by Ford are identified as Classic Parts From Original Tooling.

A reproduction part that duplicates a Ford licensed by but not manufactured by Ford is identified as an Official Licensed Product.

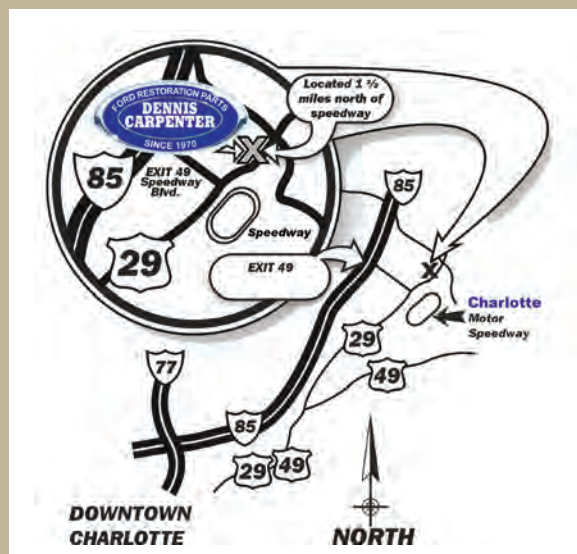

CARPENTER SHOWROOM

Be sure to visit our retail showroom in Concord, North Carolina, where you can purchase parts or browse our parts displays. We are located just 1 1/2 miles north of the Charlotte Motor Speedway.

Showroom Hours: **Mon. - Fri. 8am - 5 pm • Sat 9am - 12 noon EST**

Carpenter Industries, Inc. attempts to maintain prices as published in the catalog. Due to the fact that we purchase materials from many manufacturers, we are not able to control all product costs. If the supplier goes up, we must raise our prices accordingly. As a result, our prices do change periodically and without notice. Please feel free to contact us for confirmation on current prices.

Errors in typographical content, pricing and imagery are subject to correction and may change without notice. C.I. will not be held liable or responsible if any inaccuracy exists in specifications or pricing. Applications listed in this catalog are based on original factory information. However, variances, will occur due to non-documented substitutions and changes made during the vehicles production.

This catalog supersedes all previous editions, including prices. All rights reserved. No part of this publication may be copied, reproduced, stored in any retrieval system, communicated or transmitted in any form by any means without prior approval.

WARNING!

Some products in this catalog are known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, visit www.p65warnings.ca.gov

Dennis Carpenter Ford Restorations is a manufacturer and retailer of restoration Ford Parts and Accessories. With Dennis Carpenters you can be sure you're getting a part that is made right, fits right and lasts longer at a great price.

Celebrating 50 Years

A look at how
Dennis Carpenter
Ford Restoration Parts
has grown over
the years.

1969

Dennis starts restoration on his 1940 Ford convertible, realizes the need for plastic knobs and convinces an antique car friend into developing tooling for making them. In this photo, Dennis' son Daniel stands beside his dad's disassembled Ford.

1970

Dennis takes extra dash knobs that he made to the Hershey AACA car show and sells out. Realizing that he is able to support his hobby, he continues to develop all dash knobs for 1932-48 Fords.

FIRST BUILDING

Purchased in 1973, it still stands today.

1971

Dennis takes out a 2nd mortgage on his house and buys a bigger injection molding machine for making better quality knobs in larger quantities. He moves his part time business from home into a rented vacant railroad depot.

1972

Dennis realizes that the weatherstripping and seals he purchased for his 1940 had hardened, cracked, and needed replacement after 6 months. He is determined to make premium quality weatherstripping for his 1940. Due to minimum production requirements, he starts selling the extras.

1973

Sales of his quality dash knobs and seals takes off, so he quits his full time job as a purchaser at a local textile plant. He buys a 5,000 sq. ft. building on Hwy 29 in Concord, NC. which is still located in the front of the business today. A late night train derailment forces a rush move into the building.

1974

Dennis purchases 25 acres of land behind his business for \$75,000.

1976

Dennis builds a 10,000 sq. ft. building next to the first one and remembers thinking that he was set for life as far as buildings go. Little did he know that it would eventually grow to be over 300,000 sq. ft.

1977

Dennis purchases two used stamping presses for making stamped metal parts and a used die casting machine for making emblems.

1978

Dennis hires his first tool and die man for making tooling for more new parts. He also purchases his first new Bridgeport milling machine.

1979

Growth of the company continues, and he builds a 25,000 sq.ft. warehouse and showroom that are still in use today.

1987

Because of inconsistent size and hardness of rubber from outside suppliers, Dennis decides to develop his own rubber extruding operation from a desire to offer the very best quality weatherstripping and seals.

66-77 Ford Bronco

Daniel Carpenter and Dennis Carpenter

“Our company’s success is attributed to providing our customers with what they want- **quality products.**”

-DENNIS CARPENTER

**1990**

Dennis buys more plastic injection machines and develops more plastic parts. He also starts making Cushman Motor Scooter parts in an effort to keep his employees busy in a bad economy.

**3001****1993**

Ford Motor Company works with Dennis to become the first official Ford licensee for products made with the Ford name or logo on them.

**1994**

Dennis (the original American picker) fulfills a dream in building a museum to house his long time collection of Fords, Ford memorabilia, Cushman scooters, tractors, and Americana.

1998

Ford Motor Company works with Dennis and his son Daniel on a pilot program to start using the original Ford tooling for parts they were no longer selling.

**0001****2000**

The Original Ford Tooling program becomes official. We buy bigger machines and build more buildings to take in these large tools and run them. We continue to count it a privilege to have Ford's trust and now have hundreds of original Ford tools in use. Ford traditionally scraps tools they are finished with. We are honored to save these tools from scrap for continued use, so we can make products for all the restorers out there that need them.

2003

Our biggest warehouse is built with 48,000 sq. ft. of high stack storage.

**2005**

Daniel Carpenter purchases the company from Dennis on a payment plan. Dennis is now able to focus on his core strength of developing new products and working with the tool makers.

2009

The economic downturn forces us to cut back and examine our ways but not one of our employees is laid off during the whole downturn. We are able to purchase some much needed equipment such as a digitizer and CNC machines at bargain prices from companies that were going out of business during this time.

2010

Edsel Ford II arrives at Carpenter Industries to tour the facilities.

2011

We transition to a new software and computer system after being on an old unix based system since 1991.

2013

We launch our all new user friendly web store.

2019

Major upgrades are made to manufacturing equipment and shipping procedures at Carpenters to facilitate positive company growth.

Dennis' years of experience is a valuable asset to Daniel who is continuously improving the evolution of Dennis Carpenter Ford Restoration Parts. As for the plastic dash knobs Dennis made for his 1940 Ford years ago, they still look great!

1966

Production job #1 Oct 1, 1965. Models available: Wagon, Pickup & Roadster. All equipped with standard 170 CID 6 Cyl. engine. Optional 289 V-8 added in early 1966. The 1966 Bronco features many parts exclusive to the 1966 model year. Seats, hubcaps, taillights w/ no back-up light, transfer case shifter, door & window handles and forward mounted rear shocks are examples of these parts not shared with any other Bronco model year.

Life of the Bronco

1967

The 1967 model year brought about self adjusting brakes, seat belts and rear back-up lights as standard equipment. Optional Sport package and auxiliary fuel tank also debut. features that were changed from previous model: Hubcaps, transfer case shifter T-handle design, door handles and window cranks. Front and rear bumpers also received angled cuts on each end, which were not present in the previous model.

1968

In 1968 the dual hydraulic brake system and heater/defroster became standard equipment heat was previously an option. Electric wipers and outside swing away tire rack became optional equipment. Changed features from previous year include: Seats, dashboard and pad, dash control knobs, door latch, interior door panels, armrests, door handles and front axle lock-out hubs.

1969

Changes for the 1969 model year include replacing the 289 with the new 302 V8. Two speed electric windshield wipers replaced the vacuum units several months into production. Larger parking lights with amber lenses replaced the previously used flush mount park lights with white lenses. The Sport models now had aluminum door panel trim, pleated parchment interior, and a rear floor mat when the rear seat was ordered. The steering stabilizer also became a Standard feature.

1970

In 1970 DOT mandated side marker lights replace reflectors as standard equipment.

1971

Changes for the 1971 model year included upgrading the electrical system fuse box is moved to glove compartment. Bronco also received a mid-year change when the previously standard Dana 30 front axle was upgraded to a Dana 44. 1971 also marked the first year for the Bill Stroppe Baja Bronco option.

1972

No major vehicle changes. Last year for T-handle transfer case shifter. 170 6 Cyl. also receives air filter upgrade.

1973

The 200 CID 6-cylinder engine replaces the previously standard 170 engine. Power steering and automatic transmission options are added available only with the V-8 option. Ranger trim package is introduced.

1974

More colors added to Ranger trim package. New overhead dome light introduced.

1975

For 1975 Model year Bronco the ignition system received an upgrade to the Dura Spark Electronic ignition system. First year for unleaded fuel.

1976

For model year 1976, front disc brakes are made standard equipment. Power steering and the rear brakes receive upgrades. Power brakes and front sway-bar become optional.

1977

Rear axle receives upgrade with the addition of stronger triangulated rear differential housing. 14.4 gallon plastic rear gas tank is introduced. Gas tank filler caps hidden behind flush mounted body side gas tank doors. Introduction of solid body color w/ black grill.

HUB CAPS

PART #	PIC	DESCRIPTION	YEAR	PRICE
C7TZ-1130-H	A	- 15" Front - Stainless Steel - Open center - Includes plastic center ring	66-77	159.95 ea.

LOCKOUT HUB ACTUATING KNOB

Part #	C8TZ-1A029-A
Type	Red Plastic
Note	use w/ Dana/Spicer free running hub
Year	1968-77
Price	17.95 ea.

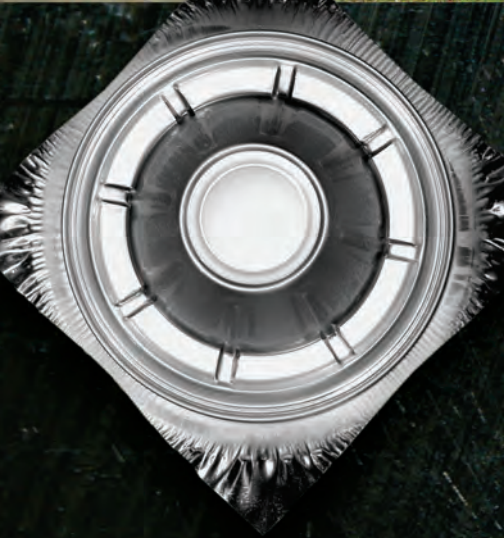

From the Stamping Presses at Dennis Carpenter Come Early Bronco Hub Caps

Above shows the line of heavy stamping presses used at Dennis Carpenters. On this day the presses were fitted with original Ford tooling to produce 1966-77 Bronco hub caps. It takes seven stamping presses, each performing a different operation, to form a single hub cap.

The first machine is a 500 ton hydraulic press that exerts the specified 245 tons of pressure onto the forming die. Here a 17" square sheet of 304 stainless steel is placed into the die. The stainless sheets are lubricated to prohibit the steel from tearing during the stamping process.

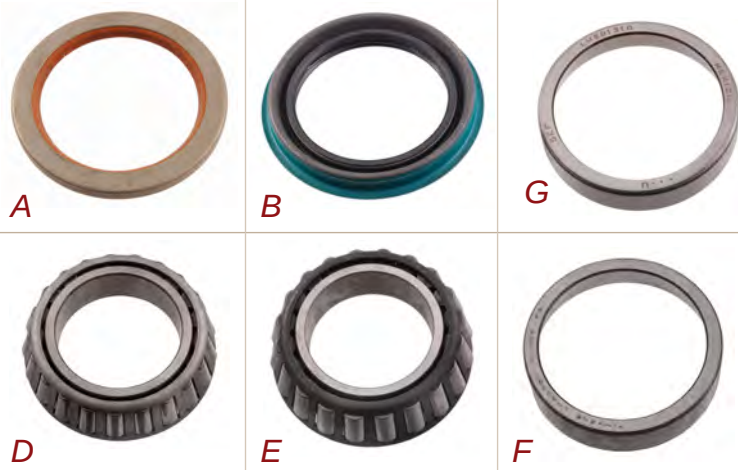

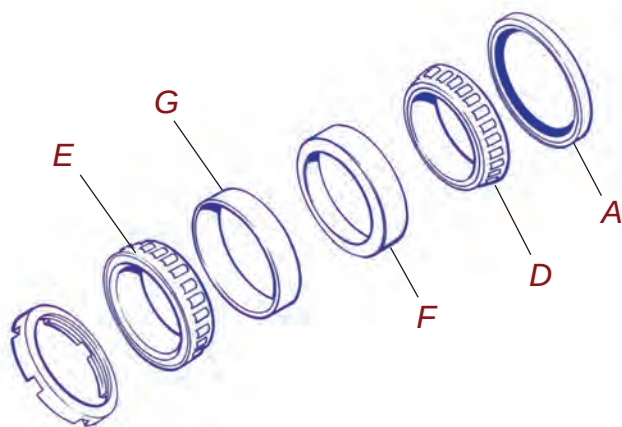

The first stamping operation forms the stainless steel sheet into the basic shape of the cap. The depth of the tool is fairly dramatic forcing the stainless steel sheet to stretch nearly three inches.

Here the hub cap has been pulled from the trimming die. The excess metal has been trimmed away and the center hole for the emblem or plastic center ring has been punched. From here the cap goes through other stamping operations to add surface textures and to form the rim grippers.

FRONT WHEEL BEARING & SEALS

PART #	PIC	DESCRIPTION	YEAR	PRICE
FRONT WHEEL SEAL

NEW 1966-77 FORD BRONCO FRAMES

Classic Series Bronco Frames

**Perfect for
OFF-ROAD / RESTORATIONS / CUSTOM BUILDS**

The KINCER Chassis Classic Series frame is the ultimate in aftermarket performance for 1966-77 Broncos. With 2x4 3/16" wall CNC Mandrel bent rectangular frame rails, the Classic Series frame eliminates chassis flex. By preserving factory body, bumper, and suspension mount locations, frame replacement could not be easier. The Classic Series frame is 2" wider inside to inside the frame rails, allowing more room for

modern drive train applications such as the Ford 5.0 Coyote, 3.5L Eco-Boost, 351W, Cummins R2.8 Turbo Diesel, 4BT, long tube headers, and clocking of Atlas transfer cases. Options include integrated body/bumper lift, custom crossmembers, and sway bar mounts.

Ford Trademarks and Trade Dress
Used Under License to
Kincer Engineering & Design, LLC*

**2x4 3/16" CNC-MANDREL
BENT FRAME RAILS**

**O.E.M. BODY
MOUNTING LOCATIONS**

V-8 ENGINE MOUNTS

**FULLY ENCLOSED
FRAME RAILS**

**2" WIDER THAN
STOCK, INSIDE TO
INSIDE FRAME RAILS**

**TRANSMISSION CROSSMEMBER
INCLUDED FOR STOCK DRIVE TRAIN
and CUSTOM CROSSMEMBERS AVAILABLE**

**STOCK
SHOCK MOUNTS**

**OPTIONAL GAS TANK TABS
& J-BOLT MOUNTS AVAILABLE**

**TWO MORE CROSSMEMBERS
THAN A STOCK FRAME**

The Ultimate In Aftermarket Performance For Early Broncos

Standard Features Include

- **2"x4"x 3/16" Wall CNC Mandrel Bent Frame Rails**
(Frame rails are thicker than original and are fully enclosed to prevent rusting from the inside out)
- **2" Wider Inside to Inside of Frame Rails Allows More Room For Drivetrain Swaps**
(Allows use of stock Coyote front drive accessories, clocking of Atlas transfer cases, and more...)
- **V-8 Engine Mounts**
(Direct bolt-in for SBF 289, 302 & 351W with stock engine mounts.)
(Coyote and Cummins R2.8 motor mounts available-ask us about your application.)
- **Front / Rear Crossmembers Offer 1" Extra Clearance To Oil Pan / Differential Housing**
- **E Brake Mount Integrated Into Middle Crossmember**
- **Two Additional Crossmembers**
(Front bumper and middle of frame)
- **1966-75 Style Track Bar Mount**
- **Stock Suspension Mount Locations**
- **Stock 1967-77 Shock Mount Locations**
- **Utilizes Stock Location for Steering Box**
- **Optional Gas Tank Tabs and J-Bolt Mounts Available**

Available Options

- **Coyote Steering Box Spacer for Clearance of Steering Shaft to Coyote Valve Cover**
- **Powder Coat**
- **Integrated Mounts for Krawlers Edge or Aftermarket Sway Bars**

Order Frames by Part Number

Frames include adapter for use of factory transmission crossmember. Custom transmission crossmembers available by special order.

D5TZ-5005-A

Classic Series Frame with Standard Body and Bumper Mounts

(Recommended if running 289 or 302 w/stock C4 or manual 3 speed transmission)

\$3,995⁰⁰

+ Crating & Shipping
F.O.B. Louisville, TN

D5TZ-5005-A2

Classic Series Frame with 2" Integrated Body and Bumper Lift

(Recommended if running 289, 302, 351W, or Coyote)

\$4,525⁰⁰

+ Crating & Shipping
F.O.B. Louisville, TN

The above recommendations are minimum body lift amounts to be used as a general guideline for various drivetrain packages and the required body clearance. Additional body lift can be added if desired. The actual amount of required lift must be verified by the builder.

D6TZ-3509-FBPC		Powder Coated - Black	76-77	721.00 ea.

Designed to fit your Bronco and does NOT require modification to your original vehicle to install. This Ford Style column features all Ford wiring, a Ford top shaft and will easily attach to your stock gearbox with a new half rag joint installation kit. Installs in the same location as the old column using your original floor mount and new dash mount. Add your stock Bronco wheel and the gripped surface will be in the same location as the original.

DIRECT FIT TILT STEERING COLUMN COLUMN SHIFT

PART #	PIC		YEAR	PRICE
D4TZ-3509-CP	C	Paintible Steel	74-75	803.00 ea.
D6TZ-3509-CP		Paintible Steel	76-77	803.00 ea.

D6TZ-3509-CBPC		Powder Coated - Black	76-77	1023.00 ea.

This column shift has all the same great features as the floor shift, and is just as easy to install. The shift pattern on the column allows you to use either a 3 or 4-speed automatic transmission. This column utilizes the original transmission mounted neutral safety switch. A gear shift indicator is an option, but not included. A shift linkage (new or original) is required for installation and will attach to the lower shift arm provided on the column. Add your stock Bronco wheel directly to the column, no adaptor required.

SHIFT INDICATOR for Ididit Steering Columns

PART #	PIC	DESCRIPTION	YEAR	PRICE
D6TZ-7033-AA	E	Shift Indicator - Acrylic - with Pointer - No housing - for AOD		29.95 ea.

FENDER FLARES - Black Only

PART #	PIC	DESCRIPTION	YEAR	PRICE
C6TZ-16038-PR	G	Front Fender	66-77	194.95 pr.
C6TZ-9829164-PR	H	Quarter Panel	66-77	219.95 pr.

Fender Flares are very popular as they allow for a larger tire & make the small amount of wheel rust disappear.

These flares will not crack like harder Fiberglass or ABS Plastic Flares. They are made from a new plastic that will bend out of the way but return to their original position under normal circumstances. Fender Flares are able to be painted.

A

B

The Gen IV is Vintage Air's most powerful and intelligent climate control system. The Gen IV uses an exclusive fully electronic microprocessor control system that eliminates cables or vacuum connections. Separate high-capacity copper parallel-flow heat coil and aluminum plate-and fin-cooling coils provide outstanding performance and instant temperature adjustments.

Additional features include variable blower speed and dash/floor/defrost blend.

**Complete kits include everything in the evaporator kit plus all under-hood components such as compressor engine brackets condenser with brackets preformed refrigerant lines drier fittings hardware & installation instructions.

- Fly-By-Wire fully electronic servo motor controls with no cables or capillary tube to route
- Infinite just-right-temperature air blending
- Infinite blower fan speed adjustment
- High-volume dehumidified defrost mode
- Separate high-capacity aluminum plate & fin cooling coil
- Copper/brass CuproBraze™ parallel-flow heater coil
- Mounts behind the dash
- New in-dash rotary controls
- Flat steel firewall cover panel
- Replacement molded glove box (reduced capacity)

Seat Belt MOUNTING BRACKET

Safety First! Seat belt anchor kits are ideal for reinforcing your mount for all seat belts. Belt anchors reduce the chance of the belt bolt tearing through the floor when the belt is under load. Rounded corners ensure that your belt will not tear from impact or normal use. Ideal for all applications. Hardware included.

What you should know about Dennis Carpenter Weather Stripping.

(It's the last one you'll ever have to replace.)

Made Right, Fits Right, Lasts Longer

4140 Concord Parkway South Concord, North Carolina 28027 U.S.A. PH. 704.786.8139 800.476.9653 EMAIL: info@dennis-carpenter.com

1. WE MAKE IT.

**Designed, Engineered and
Manufactured by Dennis Carpenter.**

Our rubber extrusion department is capable manufacturing up to 35,000 feet daily of specially formulated EPDM rubber to make our quality windshield and rear window seals. We use the same machinery to extrude thousands of feet of soft sponge rubber which is a integral component of producing our door, roof rail and trunk seals. With over forty-five years of experience Dennis Carpenter is the leading manufacturer and distributor of superior quality Ford weatherstripping and molded rubber parts.

Over 99% of our Dennis Carpenter Weather Stripping is made right here in Concord, NC, USA. We are proud to be the largest manufacturer of Ford Restoration parts made in the United States.

2. IT'S THE VERY BEST.

**Why is Dennis Carpenter WEATHER STRIPPING
the absolute best on the market?**

Combine 45 plus years of manufacturing experience with 60 durometer E.P.D.M. dense rubber compound and you get a rear window seal that not only holds 50 lbs. of safety glass in place but better resists drying and shrinking from the sun's harmful ultraviolet rays.

At Dennis Carpenter Reproductions beginning with quality ingredients is the secret to making quality weather stripping products. Our attention to detail and quality control ensures that you're getting a premium product that is the absolute best on the market.

Quality
MADE EXACTLY LIKE ORIGINAL

Tired of Slamming your Doors?

Whether you order our PREMIUM or ECONOMY version you can be assured you are buying the best on the market.

Some Bronco Door Seals on the market are made from too hard of durometer rubber. That makes your doors difficult to close. We understand this problem and have developed some of the softest high quality weather stripping available. Both versions have soft rubber extrusions and soft sponge rubber ends.

Glass
Handle

Making 1966-77 BRONCO Vent Window Seals At Dennis Carpenter

CARPENTER
MADE

PREMIUM LINE
WEATHERSTRIPPING
by Dennis Carpenter

Our 1966-77 Ford Bronco vent window seals are made on a 250 ton capacity rubber injection molding machine. This machine exerts the specified 150 tons of pressure upon a two-piece, heated mold while molten rubber compound is injected into the mold cavity. After three to four minutes of curing time at 350° the mold is opened and the formed vent window seal is extracted. Many other types of classic Ford vent window seals are made at Carpenters in the same manner.

Our Bronco Vent Window Seals Fit Right and Last Longer!

#C6TZ-9721448-PR 1966-77 Ford Bronco Vent Window Rubber Seals

At Dennis Carpenter we use 40 durometer EPDM rubber compound to make our vent window seals because of it's greater resistant to heat, sunlight and ozone. This rubber compound used in conjunction with our precision-made injection molds makes vent window seals that fit and function exactly like the Ford originals while providing the extra value of many years of weather protection for your classic Bronco.

Every Molded Detail Serves A Purpose Every Detail Recreated

A closeup reveals the circular indentations found on our Bronco vent window seals. These "dimples" align with the rivet heads on the vent window channel allowing the rubber to seal evenly against the channel without puckering. A seemingly insignificant detail but crucial to exact fitment to your door frame.

More obvious are the water drainage holes found at the base of the vent seal. These holes were engineered to allow water to drain through the seal, down into the door and then drain out the bottom. Also notice the molded circular hole for the vent window frame pivot. Another precision fit detail made to protect against water leakage.

METAL FORMING

PLASTIC INJECTION

RUBBER MOLDING

Making Door Seals From Extruded Rubber

The rubber extrusion machine (shown right) used at Dennis Carpenters extends 100' and holds hundreds of gallons rubber curing salt water. Its sole purpose is to make miles of sponge and dense rubber extrusions that are the basic components used in making Ford Bronco door seals and windshield seals.

The fact is, Dennis Carpenter has been making Ford weather stripping and rubber parts in the USA since 1970 and we feel that our long-time manufacturing experience reflects in the superior quality of our products.

It's a dirty job, but somebody has to do it.

Ken Furr has been sanding and polishing die-cast parts at Dennis Carpenter's for years. His job is to make sure that every part is slick and smooth before they get chrome plated.

The finish of this non-plated 1966-77 Bronco door handle speaks for itself and shows how good Ken is at what he does. Add the triple chrome plating and you get show quality chrome handles that have a durable finish with a mirror-like reflection that is brighter, deeper, and longer lasting.

The Quality Shows

Dennis Carpenter Bronco Door Handles.
Die-cast in Alabama,
Sanded and Polished in North Carolina,
Chrome Plated in Missouri.

ROLL FORMING

Close up of a coil of aluminum being pulled through roller dies to form Bronco side moldings

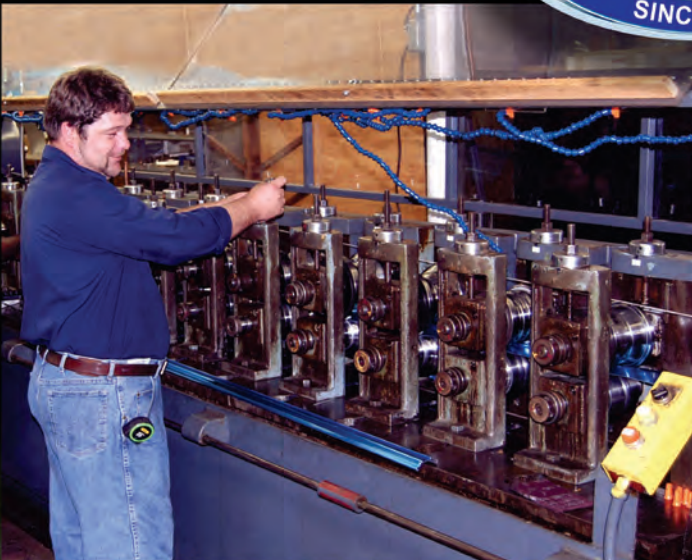

Is The Process Dennis Carpenter Uses to make 1966-77 Bronco side moldings. In this case, a coil of 5657-H25 aluminum by 2 .25" wide is pulled through a series of roller dies that progressively forms the aluminum into the shape of the side moldings. As the aluminum emerges from the forming mill it is then cut to the appropriate lengths suitable for fender, door and rear quarter moldings. After the lengths have been cut each individual piece of the molding is subjected to additional stamping operations where it receives the final formed ends.

Other products manufactured by roll forming at Dennis Carpenter's include window channels, classic Ford aluminum scuff plates and steel truck bed strips.

These are the roller dies used by Dennis Carpenter to make 1966-77 Bronco side moldings.

This 20 station roll forming mill is one of three used at Dennis Carpenters to make classic Ford car and truck parts

Why Spend Thousands On Rust Repair When You

FACTORY BODY MOUNT LOCATIONS

Our reproduction Bronco bodies mount to original Ford or reproduction Bronco frames.

PRECISION ASSEMBLY FIXTURES

Utilizing precision assembly fixtures designed and built by a former NASCAR team body engineer, we assemble our Bronco bodies on two main assembly platforms while fixturing each component as it is installed to ensure every body maintains proper door gaps and panel alignment.

ESSENTIAL SHIPPING PLATFORM

We build a heavy duty shipping platform and internal structure to ensure your Bronco body doesn't get damaged during shipment or when removed from the shipping platform. This platform is essential to supporting the body before it gets mounted to a frame.

The mandatory platform fee is \$695.00.

POWER STEERING WHEEL TUB

We've incorporated the 1973-75 style left hand front wheel tub into our Bronco bodies. This feature creates more space for the installation of a power steering system if desired.

Bronco Body with Stock Lower Quarters

\$12,950.00
+ SHIPPING & CRATING

Our stock Bronco bodies feature the original style lower quarter panels for that classic uncut look. All of our bodies come with hinged and mounted left and right doors and windshield frame.

Dennis Carpenter Steel Bronco Bodies are Approved and Officially Licensed by the Ford Motor Company.

**FORD TOOLING
ROCKER PANELS**

Our outer rocker panels are made of high quality steel at our shop in North Carolina. We use the original Ford tooling in our stamping presses to make these 1966-77 Bronco rocker panels which are then welded onto our reproduction bodies.

V8 RADIATOR SUPPORT

All Dennis Carpenter Bronco bodies feature a V8 radiator support.

**Bronco Body with Flared
Lower Quarters**

\$13,295.00
+ SHIPPING & CRATING

Our flared Bronco bodies feature lower quarter panels that were made to match the size and shape of the front fender wheel openings. This allows you to run larger wheels without cutting and adding fender flares. All of our bodies come with hinged and mounted left and right doors and windshield frame.

Protect Your Bronco's Hide

Exact-Fit Indoor Covers for 1966-77 Broncos

#COV-32 Indoor Cover for 1966-77 Ford Bronco

Ford Motor Company Trademarks and Trade Dress used under license to Carpenter Industries

Cover shown fitted to a 1973 Bronco with front brush guard and rear mounted spare tire

Fits Like A Glove.

Our covers are designed specifically to fit the early Bronco body style.

Windshield angle, hood and top lengths are factors that were addressed making Dennis Carpenter Bronco covers among the best fitting covers on the market. Made of expandable, form-fitting material, our indoor covers provide reasonable protection against dust, scratches and minor dings that can occur in a garage setting.

Featuring Bronco Graphics Printed On All Sides

Each cover comes equipped with a storage bag, tie-down strap and full elastic hem around the bottom of the cover.

EARLY BRONCO

Steel Flared Quarters

Lower Quarters Designed To **MATCH THE FRONT** Fender Wheel Openings

Build specs on pictured Bronco:
2.5" Suspension Lift (no body lift)
with 33" Tires.

**Now You Can Run Larger Tires And
Not Have To Install Fender Flares**

CLASSIC PARTS

 Classic Parts From
Original Tooling

An original Ford welding fixture is used to secure each tailgate skin as they are prepared for assembly. A suspended spot welding machine similar to those used on the Ford assembly line is used to weld the tailgates together.

from ORIGINAL FORD TOOLING.

Original Ford tooling refers to the obsolete stamping dies, plastic injection molds, roller dies and other tooling that Ford Motor Company once used for mass production of it's parts. Dennis Carpenter Ford Restoration Parts is the first member of a select group of manufacturers permitted by Ford to use their obsolete tooling to make reproduction parts for today's restoration parts industry.

part no. C6TZ-9640700-A

1966-77 Bronco steel tailgate. Stamped in the U.S.A. from original Ford tooling. Assembled at Carpenter Industries in Concord, NC.

FLAT RATE SHIPPING

ON ALL DOMESTIC GROUND ORDERS*

*RESTRICTIONS APPLY. SEE ADDITIONAL DETAILS BELOW

\$99 or LESS get \$9.99 SHIPPING
\$100 or MORE get \$14.99 SHIPPING

Must ship by "ground" service within the contiguous US. This excludes Alaska, Hawaii, and Puerto Rico. Normal carrier rates apply.

Domestic Air and International service is not included. Normal carrier rates apply. Even though an order requires multiple packages or if any of the packages are oversized, bulky, and/or heavy, the shipping is still \$14.99 excluding items that require "Freight Truck Shipping". Any "domestic ground" order with a total parts value under \$100.00 will be charged a \$9.99 minimum shipping rate. These rates include insurance and handling.

Items such as hoods, bedsides, 12' bedstrips, doors, fenders, quarter panels require freight truck shipping. Items that require freight truck shipping are noted in catalog. If items requiring freight truck shipping are ordered with flat rate items, all items will be included for the same freight truck rate. See right for more details.

Preferred Carriers

Our preferred carriers are FedEx, UPS, and USPS for all parcel shipments. No other carriers are used. No exceptions.

FedEx

Special Handling:

Retail orders requiring special handling other than flat rate ground shipping will be estimated as shown below: The prices are estimates only. Actual shipping charges will apply.

Air Shipments

	Sm. Pkg.	Med. Pkg.	Lg. Pkg.
Next Day Air:	\$75.00	\$200.00	\$450.00
Sec. Day Air:	\$65.00	\$120.00	\$420.00

Freight Truck Shipment

	Shipping Fee	Crating Fee if applicable
Residential Address	\$250.00	\$75.00
Commercial Address	\$250.00**	\$75.00

**Lift Gate Fees are included in estimates above and range from \$30 to \$40. Depending on carrier this fee may be waived for orders delivered to a commercial address.

Freight Truck Shipping fees above are estimates only. Actual freight shipping charges will be applied when the order is shipped and invoiced. Items that require a freight truck cannot be included with flat rate shipping.

International Shipments All Except Canada

When calculating shipping for international orders, please use 50% of the order total parts value or \$50.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. International orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Canadian Shipments

When calculating shipping for Canadian orders, please use 20% of the order total parts value or \$25.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. Canadian orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Merchandise Returns:

- 1 All sales are considered final with the exception of warranty claims and merchandise shipped in error.
- 2 All returned merchandise must be in original packaging and is subject to inspection and approval prior to credit or exchange. Must be in new sale condition as determined by Carpenter Industries.

It is the customer's responsibility to check parts for correct fit BEFORE installation.

Any part that has been installed, disassembled, drilled, welded, cut, painted, or modified in any way, or is missing kit components is NOT eligible for return.

Electrical items that have NOT been installed and/or plugged in are eligible for return.

Electrical items that are authorized for return are still subject to inspection and approval prior to credit and/or exchange.

No returns accepted on any literature.

Any installation, disassembly or modification by a third party on the behalf of customer does not constitute an exception to our policy. Purchaser retains full responsibility for the condition of the part.

- 3 Returns within 30 days of invoice date are acceptable, any returns received after 30 days are subject to a 20% restocking fee. Returns after 180 days are subject to a 50% restocking fee.
- 4 **Absolutely NO returns accepted after one year from date of purchase. No exceptions.**
- 5 ALL RETURNS MUST HAVE A RETURN AUTHORIZATION RA NUMBER. Please call 1-800-476-9653, option 2, to obtain an RA number. Please have your purchase invoice number available when calling. C.I. is NOT responsible for unauthorized returns.
- 6 All returns must be shipped "pre-paid" and fully insured. COD or collect returns will not be accepted. In cases where a return is due to our error, "pre-paid" shipping charges will be refunded.
- 7 Refunds will be issued based upon the method of payment. i.e. cash for cash purchases, credit on a credit card for credit card purchases, etc.. On returns due to our error, your shipping expense will be reimbursed based only upon carriers charges.
- 8 All returns should be sent to: Carpenter Industries, Inc.
4140 Concord Parkway S
Concord NC 28027

Claims:

All claims must be taken up with Dennis Carpenter Restorations.

Please inspect all orders for damage and/or errors immediately upon receipt. Report all discrepancies to Carpenter Industries at 1-800-476-9653, option 2, within 7 days of receipt. No claims accepted after 7 days.

Please hold all original boxes and packaging materials for the carrier to inspect.

Warranty

We guarantee to replace or at our option, repair any product or parts which are found to be defective in material or workmanship within one year from the date of shipment. Our obligation with respect to such products or parts shall be limited to replacement or repair and in no event shall we be liable for consequential or special damages, or for transportation, installation, adjustment, or other expenses which may arise in connection with such products or parts. THIS WARRANTY EXPRESSLY MADE IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

Dennis Carpenter Bronco Bodies are Approved and Officially Licensed by The Ford Motor Company

What Lies Beneath ?

Supporting our Dennis Carpenter Reproduction Bronco Body is a bullet proof KINCER Classic Series OEM-Style Chassis powered by a Ford Performance 5.0L 435 HP Gen2 Coyote engine. A 6R80 6-speed automatic transmission hooked to a Borg Warner 44-19 electronic shift transfer case moves it down the trail and four Wilwood disc brakes brings it all to a halt. Inside, a Krawlers Edge Custom Coyote steering column kit points it in the right direction and a Krawlers Edge Sport Cage keeps riders safe from harm.

COMPONENT PREPARATION

The key component of our Bronco body is the front floor structure. The floor is built on a precision assembly fixture to ensure exact tolerances are met and maintained during assembly. These floors are the key to a successful body build.

BODY WELDING

Welding is primarily done using Pro Spot i5 Smart spot welders. These smart spot welders measure the thickness and resistance of the metal to be welded and automatically delivers the correct weld current, weld time and squeeze pressure to maintain a consistent and maximum strength spot weld every time.

PRECISE PANEL FITMENT

As our Bronco bodies are assembled, attention is taken to strive for the best panel fitment and alignment possible.
