Made Right, Fits Right & Last Longer

All of the parts in this catalog, with the exception of new old stock Ford parts, are reproduction or equivalent replacement type parts of Ford Motor Company parts and are represented or referenced by original Ford part numbers.

Reproduction Ford parts made from obsolete Ford tooling that are

licensed by but not manufactured by Ford are identified as Classic Parts From Original Tooling.

A reproduction part that duplicates a Ford licensed by but not manufactured by Ford is identified as an Official Licensed Product.

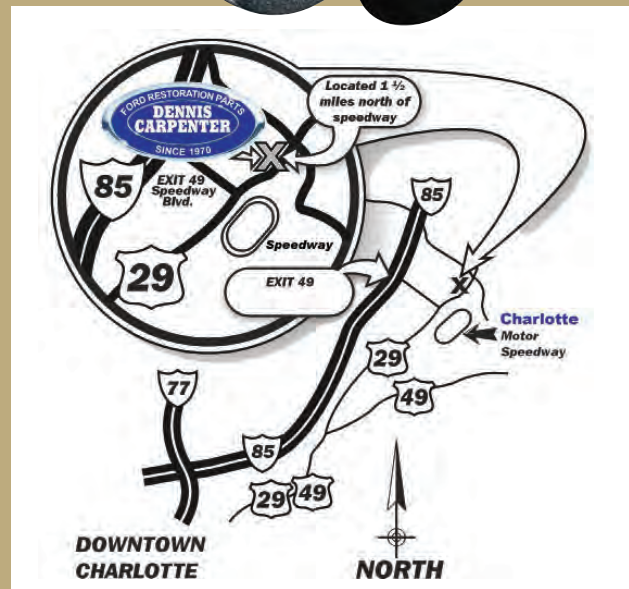

CARPENTER SHOWROOM

Be sure to visit our retail showroom in Concord, North Carolina, where you can purchase parts or browse our parts displays. We are located just 1 1/2 miles north of the Charlotte Motor Speedway.

Showroom Hours: **Mon. - Fri. 8am - 5 pm • Sat 9am - 12 noon (EST)**

We attempt to maintain prices as published in the catalog. Due to the fact that we purchase materials from many manufacturers, we are not able to control all product costs. If the supplier goes up, we must raise our prices accordingly. As a result, our prices do change periodically and without notice. Please feel free to contact us for confirmation on current prices.

Errors in typographical content, pricing and imagery are subject to correction and may change without notice. C.I. will not be held liable or responsible if any inaccuracy exists in specifications or pricing. Applications listed in this catalog are based on original factory information. However, variances, will occur due to non-documented substitutions and changes made during the vehicles production.

This catalog supersedes all previous editions, including prices. All rights reserved. No part of this publication may be copied, reproduced, stored in any retrieval system, communicated or transmitted in any form by any means without prior approval.

Carpenter Industries Inc.

Dennis Carpenter Ford Restorations is a manufacturer and retailer of restoration Ford Parts and Accessories. With Dennis Carpenters you can be sure you're getting a part that is made right, fits right and lasts longer at a great price.

Body Style Explained

Throughout our catalogs you will find Ford Body Code numbers. These numbers were used by Ford to designate what Body Styles a Ford part would fit.

For example, the Rocker Molding below would fit the Body Styles in the table that correspond to the Body Code #'s. If you find a Body Code # without a letter on the end that means that part fits all Body Codes with that number. So, a "65" fits "65A" & "65B".

ROCKER MOULDINGS

* Body codes are not shown on every single part.

Making and selling Ford car parts isn't just a business for Dennis Carpenter, it's also his passion.

Growing up on a farm in Dover, Minnesota Dennis Carpenter was raised with a strong work ethic and was taught early on how to use machinery and what made that machinery work. Like many young guys he was fascinated with automobiles and by age 12 bought a 1941 Ford 2 Dr. Sedan for \$12.00. It seemed that car, and eventually new 1961 & 1962 Galaxies, established an allegiance to Fords that Dennis Carpenter would carry with him for the rest of his life.

Since 1970, Dennis's passion for Fords and making the parts to restore them have been some of the driving forces at Dennis Carpenter Ford Restorations. From the rubber extrusion facility comes USA made, Premium Line Ford Weather Stripping products and from the stamping and injection dies comes a dynamic variety of Officially Licensed Ford and Original Ford Tooling parts.

Webster's dictionary describes passion as "implied energetic and unflagging pursuit of an aim or devotion to a cause." Dennis Carpenter's passion is to develop, engineer and produce superior Ford restoration parts.

Dennis's first Galaxie was a beautiful 61' convertible.

Dennis Carpenter with his new 1962 Galaxie purchased for a base price of 3,033.00. He did add in a push button radio for an extra \$58.50.

BEAUT **BUILT to the Highest Quality Standards**

"MASTERS"

This is the FORD in your future

The dollars you invest in this 1962 Ford-built model will be the hardest-working dollars you've ever spent. That's because Ford Quality Control continuously inspects, tests and evaluates every phase of design, production and assembly according to quality results in a 1962 Ford car that is superbly quiet, remarkably enduring and built for high resale value.

FORD built-in quality earns this car a long-term warranty*

Made more first in their field with a long-term warranty—because Ford cars have the quality to back it up. Fords are first again today in establishing a new standard of quality for the automobile industry. Drive this car—and listen for the silence that speaks only of quality. Remine it—and see the ease with which it has been put together. Enjoy Ford quality craftsmanship today—and for many long years to come.

*Each part of a new Ford, except tires, is covered by a 3-year or 50,000-mile warranty. Tires are covered by a 3-year or 50,000-mile warranty. Owners are responsible for correct installation and proper maintenance of maintenance items such as tires, spark plugs, and engine oil.

60-72 Ford Galaxie

* also fits Mercury

100% of our original Ford Tooling parts are made in the U.S.A.

steering wheels, hub caps, fenders, grilles, door panels, side moldings and more

We are honored and very thankful to Ford for allowing us to save many of the original Ford factory tools from the scrap pile. With these original factory tools we are able to continue serving restorers like you with quality parts that have the original factory fit and finish and are made in the USA.

In 1998 we started bringing these original tools to our facility. We soon realized that we needed to buy bigger presses to run these large tools and needed to build more buildings to house everything. For example, in 2002 we learned that Ford's supplier that had made their hub caps since the 1930's was going out of business. We purchased six of the

original presses from their production line, so that we could continue making hub caps from the original Ford tooling. With the future in mind, we continue bringing in more original tools that Ford has quit using for 1970-1990's pickup truck parts.

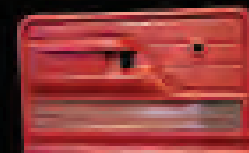

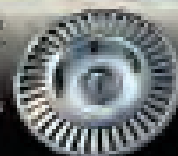

When you see the above symbol on a part, rest assured that it will have the factory fit and finish and it was proudly made in the USA.

We appreciate your business!

Daniel and Dennis Carpenter

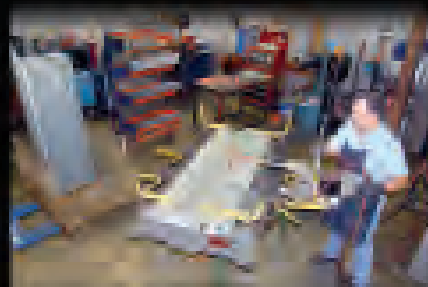

1967 Ford Car Hub Caps

1975-79 F-100 Interior Door Panels

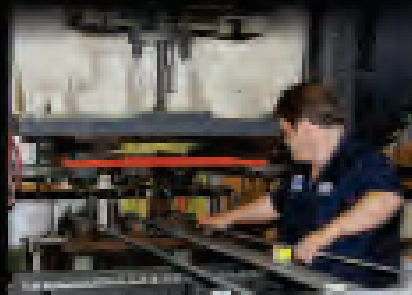

Bronco and F-100 Sidepanels

Molding original Ford tooling, 1968-77 Bronco sidepanels

Thousands of original Ford tools are stored in several warehouses at the Carpenter facility

This press is fitted with a 3-stage progressive stamping die that makes 1977-79 F-100 hood-trunk moldings.

*Headline derived from the fact that all listed Ford tooling remains in the USA.

Note: Does not fit movable column

In order to shed some weight from the big Galaxies to make them competitive on the drag strips, Ford replaced the hoods, front fenders and trunk lids with fiberglass units. Other weight shaving measures included ditching the carpeting, sound barrier insulation, body sealant, radio, heater, arm rests, trunk mat, spare tire and jack.

All of the dieting managed to bring the Galaxies down to 3,480 lbs ready to race.

Dennis Carpenter Ford Collection

In 1967 Colorado resident Steve Baker bought this 1963 lightweight off the used car lot at **Arnold Bros. Ford** in Boulder and for about two years drove it daily since it was his only means of transportation. Though he occasionally showed what the big Ford could do on the street, Steve never raced the car on the drag strip. Tragically, in 1970 Steve Baker was killed in a road accident and the Galaxie was set aside for many years by his widow. Several years ago the rare Galaxie came out of hibernation and is now part of Dennis Carpenter's classic Ford collection.

425 H.P.

July 1963 Hot Rod Magazine tested a different Galaxie Lightweight
1/4 mile 12.29 @ 117mph

Dash mounted tach, aluminum case Borg-Warner T-10 4 speed manual transmission and light weight Bostrom police car seats are hallmarks of authentic factory lightweights.

Though his collection consists of many early V8 Fords, Dennis has a particular fondness for Galaxies and quite often drives his powder blue 1963 Galaxie 500 convertible to work. Since Carpenter Industries is located quite literally in the back yard of Charlotte's Z-Maxx Dragway, DC might someday get the itch to launch the historic factory lightweight down the quarter mile.

What lies beneath the Comthvain White fiberglass hood is a Ford FE 427 cast iron big block with cast iron cylinder heads and a pair of Holley four barrel carburetors bolted to a single-plane intake manifold. Bore and stroke comes to 4.23 x 3.78 inches with five cross-bolted main bearings and mechanical lifters. At 5,800 RPM the big block makes about 425 horsepower blowing through a pair of factory cast iron headers.

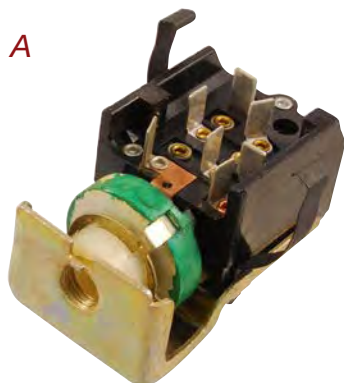

Part of Ford Motor Company's efforts to lighten the Galaxies included installing aluminum front and rear bumpers.

Dennis Carpenter Weather Stripping.
(It's the last one you'll ever have to replace.)

PREMIUM^{LINE}
WEATHER STRIPPING

by Dennis Carpenter

Made Right, Fits Right, Lasts Longer

4140 Concord Parkway South Concord, North Carolina 28027 U.S.A. PH. 704.786.8139 800.476.9653 EMAIL: info@dennis-carpenter.com

1. WE MAKE IT.

**Designed, Engineered and
Manufactured by Dennis Carpenter.**

Our rubber extrusion department is capable manufacturing 15,000 feet daily of specially formulated EPDM rubber to make our quality windshield and rear window seals. We use the same machinery to extrude thousands of feet of soft sponge rubber which is a integral component of producing our door, roof rail and trunk seals. With over forty-five years of experience Dennis Carpenter is the leading manufacturer and distributor of superior quality Ford weatherstripping and molded rubber parts.

Over 99% of our Dennis Carpenter Weather Stripping is made right here in Concord, NC, USA. We are proud to be the largest manufacture of Ford Restoration parts made in the United States.

2. IT'S THE VERY BEST.

**Why is Dennis Carpenter Weather Stripping
the absolute best on the market?**

Combine 45 plus years of manufacturing experience with 60 durometer E.P.D.M. dense rubber compound and you get a rear window seal that not only holds 50 lbs. of safety glass in place but better resists drying and shrinking from the sun's harmful ultraviolet rays.

At Dennis Carpenter Reproductions beginning with quality ingredients is the secret to making quality weather stripping products. Our attention to detail and quality control ensures that you're getting a premium product that is the absolute best on the market.

Competitor Brand

Salt Is The Cure and this machine makes it work.

Technically a mixture of potassium nitrate and sodium nitrate is used to cure the rubber that our Premium Line windshield and rear window seals are made of but that's only part of the story. In the mid 1980's Dennis Carpenter envisioned a facility equipped with the machinery that could manufacture his brand of Ford weatherstripping that was formulated to his specifications. Then in 1987 Dennis and employee Karl Young, along with other skillful Carpenter employees, embarked on a six month long project to construct a machine that would extrude the rubber necessary to make Ford window and door seals. The finished extrusion machine consisted of a Davis-Standard Model 350SII extruder turning a 3 1/2" diameter screw, 70' of elevated stainless steel curing tanks connected to an additional 30' of water filled stainless steel tanks needed for cooling and rinsing the heated rubber. To resist corrosion from the potassium/sodium nitrate mixture all of the plumbing, hardware, and fixtures used in the construction were also made of stainless steel. With the safety of his employees in mind a complete exhaust system was constructed and installed to extract the fumes generated by the curing process.

Finally in November of 1987 as witnessed by Dennis Carpenter, Karl Young, and a few employees the first footage of Ford windshield rubber extrusion began flowing through the dies. To this day the same rubber extrusion machine that Dennis and his employees built over a quarter century ago is still being used at Carpenter Industries and is capable of producing over 15,000 feet of extruded rubber during a ten hour shift.

Brilliant Chrome Plated Finish
Screws Included

WARNING: Cancer & Reproductive Harm - www.P65Warnings.ca.gov

What does it mean? In short, it means Ford parts made **EXACTLY** like originals

ORIGINAL TOOLING describes the stamping dies, injection molds, roller dies and other tools of mass production that the Ford Motor Company used to manufacture the parts necessary to assemble their cars and trucks. (See ORIGINAL TOOLING below.)

FORD Logo - A most important logo assuring customers of the true origin and authenticity of the classic parts produced from this program. They're also the company responsible for making the tooling in the first place.

0 0 0 1 - These numbers identify Dennis Carpenter Ford Restorations as the first member of a select group to manufacture parts off original tooling, parts which comply with quality standards established by Dennis Carpenter and the Ford Motor Company. What this means is that we've dusted off certain tooling and started using them again, continuing to make quality parts as good or better than the Ford originals.

ORIGINAL TOOLING in Action!

On the right is half of a 1966 Galaxie hub cap forming die mounted in a press. The first stamping operation of making the hub cap is shown below. Each cap proceeds through 5 different stamping operations before completion.

MADE ON
The ORIGINAL Ford Dies

FLARE CLIP PLIERS

Used to install flare style type clips.

PART #	PRICE
TL-300	14.95 ea.

Outer center tabs

Many molding clips are a flare type design. To install a flare type clip you place the clip into position on body. Then use these specially made pliers to squeeze two outer center tabs together forcing the inner flare tabs to pinch against sheet metal thus holding the clip into place.

WARNING: Cancer & Reproductive Harm - www.P65Warnings.ca.gov

IMPORTANT NOTE

The Clips on the following pages are listed with bodystyles, location, quantities etc. Every effort has been made to ensure the accuracy of this information.

However, due to different assembly plants, use of different clips by body shops during accident repairs, previous restoration etc. your car might not match exactly. Therefore, use this information as a guide, check your car and order accordingly.

Body Codes Explained

Throughout our catalogs you will find Ford Body Code numbers. These numbers were used by Ford to designate what Body Styles a Ford part would fit.

For example, the Rocker Molding below would fit the Body Styles in the table that correspond to the Body Code #'s. If you find a Body Code # without a letter on the end that means that part fits all Body Codes with that number. So, a "65" fits "65A" & "65B".

'63-'64 Vent Window Regulator Repair

All you '63-'64 Galaxie owners know the problem. Open the vent window and it moves back and forth about 2 or 3 inches and the handle moves in and out about 3/4 of an inch. Then you go to close it and you can't quite get it to close and so you have wind noise. Also the handle tries to eat the door upholstery.

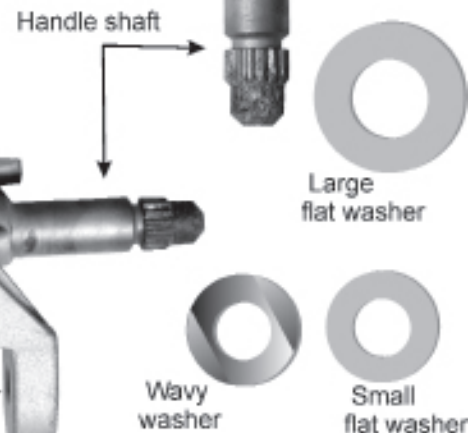

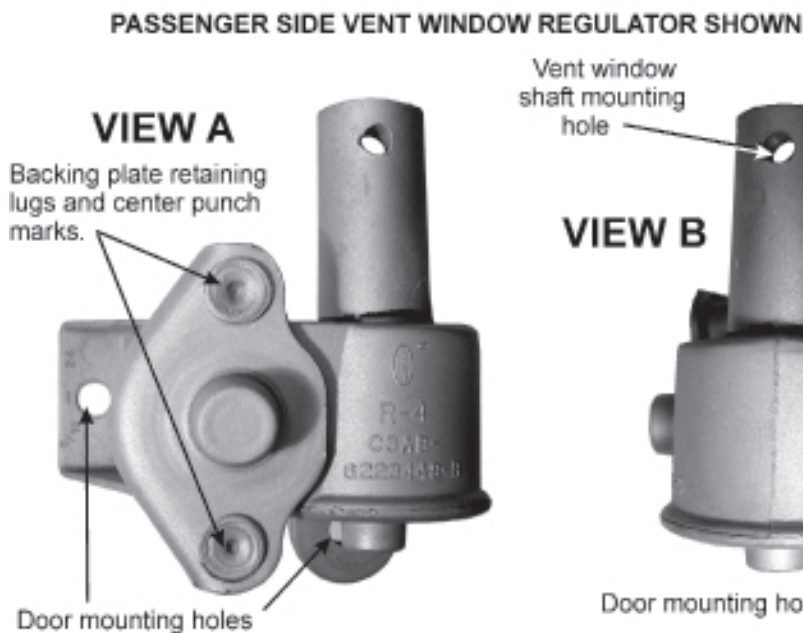

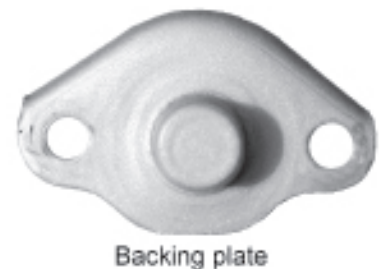

Here is my fix-for-it that I've been using since 1964, so I guess you can say that it's a proven method. You have to remove the door upholstery panel and the vent regulator from the door. Make sure you have all the pieces; you'll probably have to fish around in the bottom of the door for them. Now is a good time to clean out all the dirt and leaves and the drains in the bottom of the door too. What you'll probably find is the backing plate and wavy washer. Disassemble the regulator - don't try to remove the vent window shaft from the regulator, it's not necessary - and clean all the parts in solvent and blow them dry. Now check to make sure that both gears are good and that you have all the parts. If the gears

are bad or you're missing any parts, better find another regulator, and they aren't interchangeable from side to side.

Parts list: Main regulator body with vent window shaft and gear inside, backing plate, handle shaft with gear, large flat washer, wavy washer and small flat washer.

Now for the fix. Clamp the regulator in a vice and file the backing plate lugs down. They have to be filed below the surface of the backing plate about 1/8 inch. Fit the plate on the regulator to make sure. Now in the center of the lugs will be a center punch (see view A). Drill and tap a hole in each one for a 10-32 machine screw. Next comes the reassembly. Blow out all of the filings and make sure the regulator is clean inside. Pack the inside with white grease. Put the large flat washer inside the regulator over the handle shaft hold and install the shaft into the regulator with a twisting motion to engage the gears. Then put the small flat washer onto the shaft and then the

wavy washer. Almost done. Now install the backing plate. To hold it on, use two 10-32 x 1/2 inch machine screws and two #10 flat washers. Put red "Locktight" on the screws to help keep them from coming loose. Then put a handle on and see how good you are. The rest is just a matter of putting the door back together. And there you have it...better than new and it won't come apart again.

Converting Your Galaxie From a Generator to an Alternator

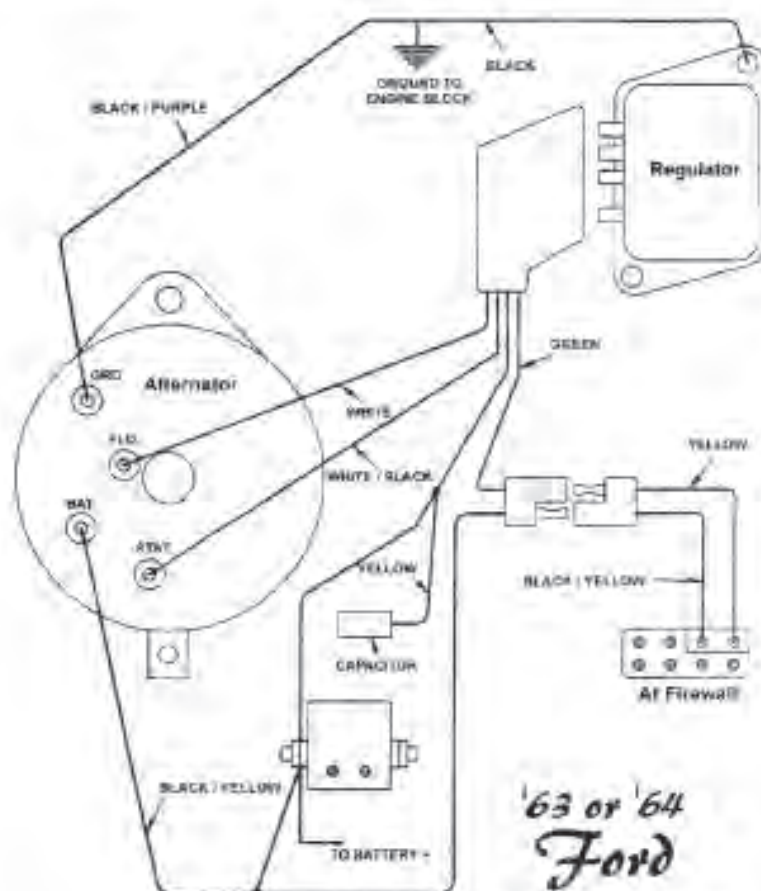

by Gene Saathoff & Mark Reynolds

(Ed: We get a lot of folks asking how to convert from an alternator to a generator. So we have reprinted this article from our March-April 1998 issue.)

Converting to an alternator from a generator is a fairly simple operation. Of course you will need to go to a salvage yard unless you already have the necessary parts, to get the alternator, regulator, wiring and brackets. As for the brackets, you need to find a '65 or later Ford with the big block or small block that matches yours. 289=289, 302, 351W or 352, 390=352, 390, 427, 428 Also, if you use the 62,63 or 64 water pump there is a dowel pin that has to be removed and tapped for a bolt on the big block engines. You can also use a later model (65-69) water pump to remedy this.

I like to get '65 Fairlane wiring, although most '65 or slightly newer Ford will work, from the fire wall to the regulator and to the starter solenoid. If you follow the following schematic it should work fine for you.

After installing the system you may notice that the alternator (what used to be the generator) light doesn't want to go out after starting the car. If you rev the engine a little it should go out. The reason for this is because on alternator equipped cars there is a 15 ohm resistor wired parallel to the alternator light. This is not necessary with your car if it doesn't bother you to just rev it up a little after starting it. The strange thing I've found is that one Galaxie that I put the alternator on, I had to rev up to get the light out but another one I have doesn't require it.

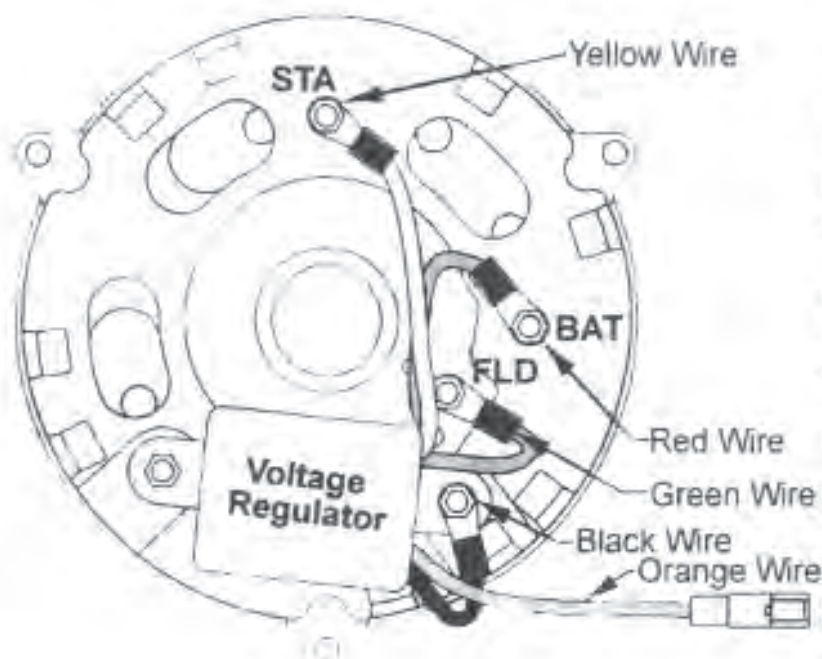

Conversion from Generator Charging System to Alternator Charging System

The above described conversion is the least expensive way to do an alternator conversion. If you have some extra money an alternative is to get a "one wire" alternator from Summit Racing Equipment or Jegs Automotive. They can be bought chrome plated and they have a built in voltage regulator.

However, they can cost way over \$100 dollars. They only need the brackets and the wire goes to the battery. No wiring harness or regulator is needed. These would be for resto-mods where detail may be wanted in the way of chrome or polished aluminum.

On the next page you can see an alternative and the instructions to use a bolt on regulator that is available. With this particular conversion module you can put any 60's alternator on your early 60's Galaxie. You will need the alternator brackets off of any 352, 390 or 428 engine. I find a lot of them on pickup trucks. There are 3 bracket pieces and 3 bolts. You will also need a newer style water pump. Other than

List of Parts needed:

1. Transpo Alternator Conversion Voltage Regulator
2. 1965-1972 FE water pump or else pull the dowl pin and tap the hole on your existing pump.
3. Alternator brackets from any FE engine. There are a couple of styles that allow for high mount of alternator (most common) and low mount.

I totally remove the old voltage regulator and run a 10 gauge wire over to the positive side of the solenoid post. You also have to tie the yellow and black wire with gray stripe together that connected tot he old voltage regulator and connect them to the 10 gauge red wire.

that, it is a snap! From the battery post (BAT) you connect a 10 gauge wire and route it over to your solenoid post on the positive side of the batter. The orange wire is your dash light connection.

I have two cars that I have converted this way and I know of a number of members who have done it this way also. As you can see it is a lot simpler and quicker than using the wiring harness mentioned in the previous part of the article.

What I have found is that you do need two more nuts to place behind the regulator to get it to clear everything OK.

You can buy these from numerous source. We advertise them in our ad under classifieds. On one car I used a standard Ford alternator from Summit that was chrome plated and this conversion. It was somewhat less to do it this way than to get a "one wire" alternator, which as far as I can tell are Delco GM alternators. I have known a few folks who have tried to use them, and have found bracket problems doing it that way. This conversion is effectively a "one wire" design, except you do get the added benefit of having a dash light pigtail also.

©2007 FORD CREDIT

1964

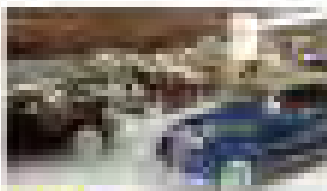

There's more than just a machine underneath that 40-year-old Mustang. It's also a machine making customers happy. So happy that 1964 to 1966 the original Ford Mustang was born.

2007

1967

Ford Credit Company went all-in to become the first office that carries the pressure made with the Ford Mustang logo at 1967.

1968

Starting this program, we've been able to show the big picture of Ford's 1968 and 1969. It's not just a car, it's a lifestyle.

1969

After Major Chrysler, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2007

2001

Ford Credit Ford Telling program started office. The first 1968 and 1969 Ford Mustang. It's not just a car, it's a lifestyle. It's not just a car, it's a lifestyle. It's not just a car, it's a lifestyle.

2003

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2005

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2007

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2010

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2011

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

2013

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

After Credit, we've been able to make the original Ford Mustang. It's not just a car, it's a lifestyle.

www.fordcredit.com

FLAT RATE SHIPPING

ON ALL DOMESTIC GROUND ORDERS*

*RESTRICTIONS APPLY. SEE ADDITIONAL DETAILS BELOW

\$99 or LESS get \$9.99 SHIPPING
\$100 or MORE get \$14.99 SHIPPING

Must ship by "ground" service within the contiguous US. (This excludes Alaska, Hawaii, and Puerto Rico. Normal carrier rates apply.)

Domestic Air and International service is not included. Normal carrier rates apply. Even though an order requires multiple packages or if any of the packages are oversized, bulky, and/or heavy, the shipping is still \$14.99 excluding items that require "Freight Truck Shipping". Any "domestic ground" order with a total parts value under \$100.00 will be charged a \$9.99 minimum shipping rate. These rates include insurance and handling.

Items such as hoods, bedsides, 12' bedstrips, doors, fenders, quarter panels require freight truck shipping. Items that require freight truck shipping are noted in catalog. If items requiring freight truck shipping are ordered with flat rate items, all items will be included for the same freight truck rate. See right for more details.

Preferred Carriers

Our preferred carriers are FedEx, UPS, and USPS for all parcel shipments. No other carriers are used. No exceptions.

FedEx

Special Handling:

Retail orders requiring special handling other than flat rate ground shipping will be estimated as shown below: The prices are estimates only. Actual shipping charges will apply.

Air Shipments

	Sm. Pkg.	Med. Pkg.	Lg. Pkg.
Next Day Air:	\$40.00	\$100.00	\$200.00
Sec. Day Air:	\$30.00	\$75.00	\$170.00

Freight Truck Shipment

	Shipping Fee	Crating Fee (if applicable)
Residential Address	\$250.00	\$75.00
Commercial Address	\$250.00**	\$75.00

**Lift Gate Fees are included in estimates above and range from \$30 to \$40. Depending on carrier this fee may be waived for orders delivered to a commercial address.

Freight Truck Shipping fees above are estimates only. Actual freight shipping charges will be applied when the order is shipped and invoiced. Items that require a freight truck cannot be included with flat rate shipping.

International Shipments (All Except Canada)

When calculating shipping for international orders, please use 50% of the order total parts value or \$50.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. International orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Canadian Shipments

When calculating shipping for Canadian orders, please use 20% of the order total parts value or \$25.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. Canadian orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Merchandise Returns:

- 1) All sales are considered final with the exception of warranty claims and merchandise shipped in error.
- 2) All returned merchandise must be in original packaging and is subject to inspection and approval prior to credit or exchange. Must be in new sale condition as determined by Carpenter Industries.

It is the customer's responsibility to check parts for correct fit BEFORE installation.

Any part that has been installed, disassembled, drilled, welded, cut, painted, or modified in any way, or is missing kit components is NOT eligible for return.

Electrical items that have NOT been installed and/or plugged in are eligible for return.

Electrical items that are authorized for return are still subject to inspection and approval prior to credit and/or exchange.

No returns accepted on any literature.

Any installation, disassembly or modification by a third party on the behalf of customer does not constitute an exception to our policy. Purchaser retains full responsibility for the condition of the part.

- 3) Returns within 30 days of invoice date are acceptable, any returns received after 30 days are subject to a 20% restocking fee. Returns after 180 days are subject to a 50% restocking fee.
- 4) **Absolutely NO returns accepted after one year from date of purchase. No exceptions.**
- 5) ALL RETURNS MUST HAVE A RETURN AUTHORIZATION (RA) NUMBER. Please call 1-800-476-9653, option 2, to obtain an RA number. Please have your purchase invoice number available when calling. C.I. is NOT responsible for unauthorized returns.
- 6) All returns must be shipped "pre-paid" and fully insured. COD or collect returns will not be accepted. In cases where a return is due to our error, "pre-paid" shipping charges will be refunded.
- 7) Refunds will be issued based upon the method of payment. (i.e. cash for cash purchases, credit on a credit card for credit card purchases, etc.). On returns due to our error, your shipping expense will be reimbursed based only upon carriers charges.
- 8) All returns should be sent to: Carpenter Industries, Inc.
4140 Concord Parkway S
Concord NC 28027

Claims:

All claims must be taken up with Dennis Carpenter Restorations.

Please inspect all orders for damage and/or errors immediately upon receipt. Report all discrepancies to Carpenter Industries at 1-800-476-9653, option 2, within 7 days of receipt. No claims accepted after 7 days.

Please hold all original boxes and packaging materials for the carrier to inspect.

Warranty

We guarantee to replace or at our option, repair any product or parts which are found to be defective in material or workmanship within one year from the date of shipment. Our obligation with respect to such products or parts shall be limited to replacement or repair and in no event shall we be liable for consequential or special damages, or for transportation, installation, adjustment, or other expenses which may arise in connection with such products or parts. THIS WARRANTY EXPRESSLY MADE IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.
