Made Right, Fits Right & Last Longer

All of the parts in this catalog, with the exception of new old stock Ford parts, are reproduction or equivalent replacement type parts of Ford Motor Company parts and are represented or referenced by original Ford part numbers.

Reproduction Ford parts made from obsolete Ford tooling that are licensed by but not manufactured by Ford are identified as Classic Parts From Original Tooling.

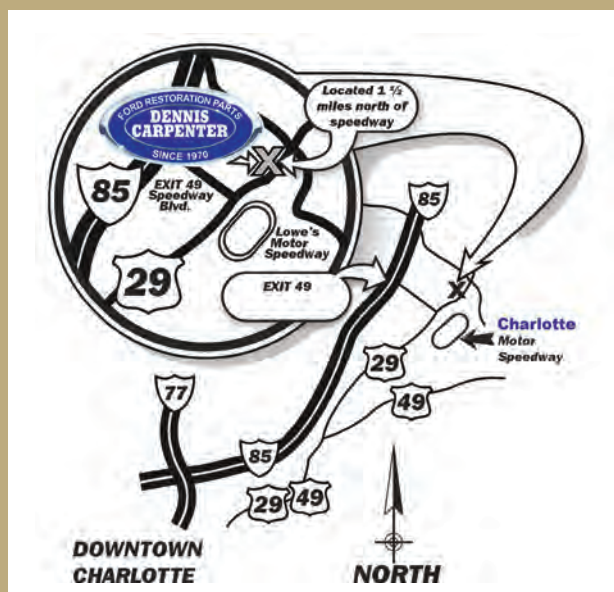

A reproduction part that duplicates a Ford licensed by but not manufactured by Ford is identified as an Official Licensed Product.

CARPENTER SHOWROOM

Be sure to visit our retail showroom in Concord, North Carolina, where you can purchase parts or browse our parts displays. We are located just 1 1/2 miles north of the Charlotte Motor Speedway.

Showroom Hours: **Mon. - Fri. 8am - 5 pm • Sat 9am - 12 noon (EST)**

We attempt to maintain prices as published in the catalog. Due to the fact that we purchase materials from many manufacturers, we are not able to control all product costs. If the supplier goes up, we must raise our prices accordingly. As a result, our prices do change periodically and without notice. Please feel free to contact us for confirmation on current prices.

Errors in typographical content, pricing and imagery are subject to correction and may change without notice. C.I. will not be held liable or responsible if any inaccuracy exists in specifications or pricing. Applications listed in this catalog are based on original factory information. However, variances, will occur due to non-documented substitutions and changes made during the vehicles production.

This catalog supersedes all previous editions, including prices. All rights reserved. No part of this publication may be copied, reproduced, stored in any retrieval system, communicated or transmitted in any form by any means without prior approval.

Carpenter Industries Inc.

Dennis Carpenter Ford Restorations is a manufacturer and retailer of restoration Ford Parts and Accessories. With Dennis Carpenters you can be sure you're getting a part that is made right, fits right and lasts longer at a great price.

Celebrating 45 Years

A look at how
Dennis Carpenter
Ford Restoration Parts
has grown over
the years.

1969

Dennis starts restoration on his 1940 Ford convertible, realizes the need for plastic knobs and convinces an antique car friend into developing tooling for making them. In this photo, Dennis' son Daniel stands beside his dad's disassembled Ford.

1970

Dennis takes extra dash knobs that he made to the Hershey AACA car show and sells out. Realizing that he is able to support his hobby, he continues to develop all dash knobs for 1932-48 Fords.

FIRST BUILDING

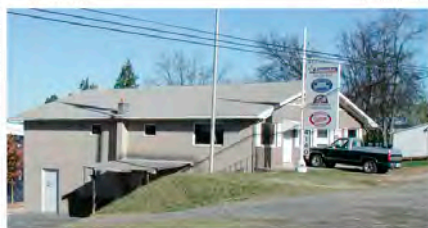

Purchased in 1973, it still stands today.

1971

Dennis takes out a 2nd mortgage on his house and buys a bigger injection molding machine for making better quality knobs in larger quantities. He moves his part time business from home into a rented vacant railroad depot.

1972

Dennis realizes that the weatherstripping and seals he purchased for his 1940 had hardened, cracked, and needed replacement after 6 months. He is determined to make premium quality weatherstripping for his 1940. Due to minimum production requirements, he starts selling the extras.

1973

Sales of his quality dash knobs and seals takes off, so he quits his full time job as a purchaser at a local textile plant. He buys a 5,000 sq. ft. building on Hwy 29 in Concord, NC. which is still located in the front of the business today. A late night train derailment forces a rush move into the building.

1974

Dennis purchases 25 acres of land behind his business for \$75,000.

1976

Dennis builds a 10,000 sq. ft. building next to the first one and remembers thinking that he was set for life as far as buildings go. Little did he know that it would eventually grow to be over 300,000 sq. ft.

1977

Dennis purchases two used stamping presses for making stamped metal parts and a used die casting machine for making emblems.

1978

Dennis hires his first tool and die man for making tooling for more new parts. He also purchases his first new Bridgeport milling machine.

1979

Growth of the company continues, and he builds a 25,000 sq. ft. warehouse and showroom that are still in use today.

1987

Because of inconsistent size and hardness of rubber from outside suppliers, Dennis decides to develop his own rubber extruding operation from a desire to offer the very best quality weatherstripping and seals.

Daniel Carpenter and Dennis Carpenter

“Our company’s success is attributed to providing our customers with what they want- **quality products.**”

-DENNIS CARPENTER

2010

Edsel Ford II arrives at Carpenter Industries to tour the facilities.

2011

We transition to a new software and computer system after being on an old unix based system since 1991.

2013

We launch our all new user friendly web store and introduce flat rate shipping to better serve our customers.

Dennis still works at the business everyday and enjoys every bit of it. Also, those knobs and weatherstripping he put on his 1940 convertible back in the 1970s are still good to this day.

1990

Dennis buys more plastic injection machines and develops more plastic parts. He also starts making Cushman Motor Scooter parts in an effort to keep his employees busy in a bad economy.

3001

1993

Ford Motor Company works with Dennis to become the first official Ford licensee for products made with the Ford name or logo on them.

1994

Dennis (the original American picker) fulfills a dream in building a museum to house his long time collection of Fords, Ford memorabilia, Cushman scooters, tractors, and Americana.

1998

Ford Motor Company works with Dennis and his son Daniel on a pilot program to start using the original Ford tooling for parts they were no longer selling.

0001

2000

The Original Ford Tooling program becomes official. We buy bigger machines and build more buildings to take in these large tools and run them. We continue to count it a privilege to have Ford’s trust and now have hundreds of original Ford tools in use. Ford traditionally scraps tools they are finished with. We are honored to save these tools from scrap for continued use, so we can make products for all the restorers out there that need them.

2003

Our biggest warehouse is built with 48,000 sq. ft. of high stack storage.

2005

Daniel Carpenter purchases the company from Dennis on a payment plan. Dennis is now able to focus on his core strength of developing new products and working with the tool makers.

2009

The economic downturn forces us to cut back and examine our ways but not one of our employees is laid off during the whole downturn. We are able to purchase some much needed equipment such as a digitizer and CNC machines at bargain prices from companies that were going out of business during this time.

TILT FLOOR SHIFT

Ididit Universal Tilt Series columns are by far our most popular steering columns and are an industry standard.

PART #	DESCRIPTION	TYPE	YEAR	PRICE
UT30-3509-FP	• Paintable Steel • 2" Tube Diameter • 1" DD Lower Shaft • 3 7/8" GM Style Wiring Plug	30" Overall Length	48-56	399.95 ea.

Features Include:

- 8 position tilt
- 4 Way Flashers
- Horn Wiring
- Standard Dress Up Kit
- Self Cancelling Turn Signal

FLOOR MOUNTS ARE ESSENTIAL FOR PROPER STEERING COLUMN INSTALLATION.

SWIVEL BALL FLOOR MOUNT

PART #	DESCRIPTION	PRICE
FFM-3513-SW	For 2" Tube - Floor Shift	124.95 ea.
CFM-3513-SW	For 2 1/4" Tube - Column Shift	124.95 ea.

The ididit swivel ball floor mount allows you to precisely position your steering column right where you want it. You can move it up, down, side to side and everything in between. A trim ring for the engine compartment side is included along with all the necessary hardware for installation. Available in polished aluminum. For aftermarket columns only.

POLISHED ALUMINUM

ADJUSTABLE FLOOR MOUNT

PART #	Pic	DESCRIPTION	YEAR	PRICE
FFM-3513-AJ	A	For 2" Tube - Floor Shift	48-56	32.95 ea.
CFM-3513-AJ		For 2 1/4" Tube - Column Shift	48-56	32.95 ea.

A

This inexpensive steel floor mount will safely secure your column at the floor board or firewall and can adjust to fit most angles, up or down.

TILT COLUMN SHIFT

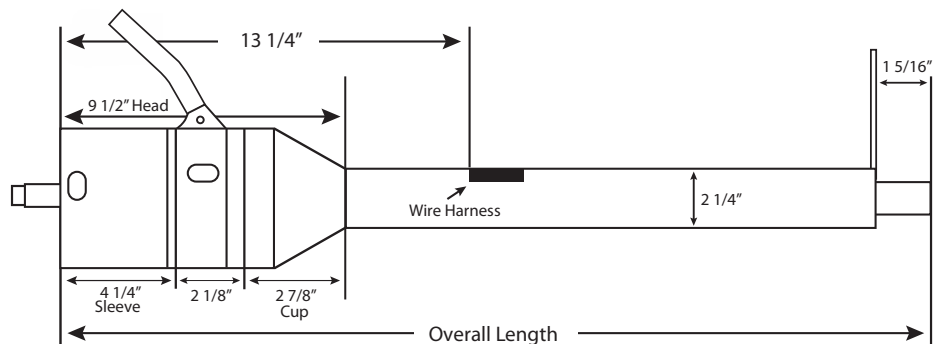

The ididit Universal Tilt Column Shift column was the first on the market to feature a removable, indexable lower shift arm. With 12 possible positions, adjustability is just a turn of a wrench away! Will work with Ford, GM & Chrysler 3 or 4 speed automatic transmissions.

PART #	DESCRIPTION	TYPE	PRICE
UT30-3509-FP	• Paintable Steel • 2 1/4" Tube Diameter • 1" DD Lower Shaft • 3 7/8" GM Style Wiring Plug	30" Overall Length	399.95 ea.

Features Includes:

- 8 position tile
- Horn Wiring
- 4-way Flashers
- Standard Dress Up Kit
- Self Cancelling Turn Signals
- Indexable Lower Shift Arm - 12 possible positions

- Please Note: This column does NOT come with a neutral safety switch. If you have a transmission mounted switch, a neutral safety switch on the column is not needed.

STEERING COLUMN DROP

Mounting bolts are set 2 5/8" apart

Cab Replacement

The following is an excerpt from the 1948-52 Shop Manual, pages 317-318.

A. Cab Removal (Conventional)

Remove the steering wheel. Disconnect all wiring, lines and linkage that are secured to the cowl into the driver's compartment. Remove the steering column floor board bracket. Remove the steering column opening plate at the floor board. Remove the clutch and brake pedal pads. remove the floor mat. remove the transmission gear shift lever assembly. Disconnect the fuel line at the fuel tank. Remove the fender splash pans from under the fenders. Remove the cab hold-down bolts at each side of the frame.

B. Cab Installation (Conventional)

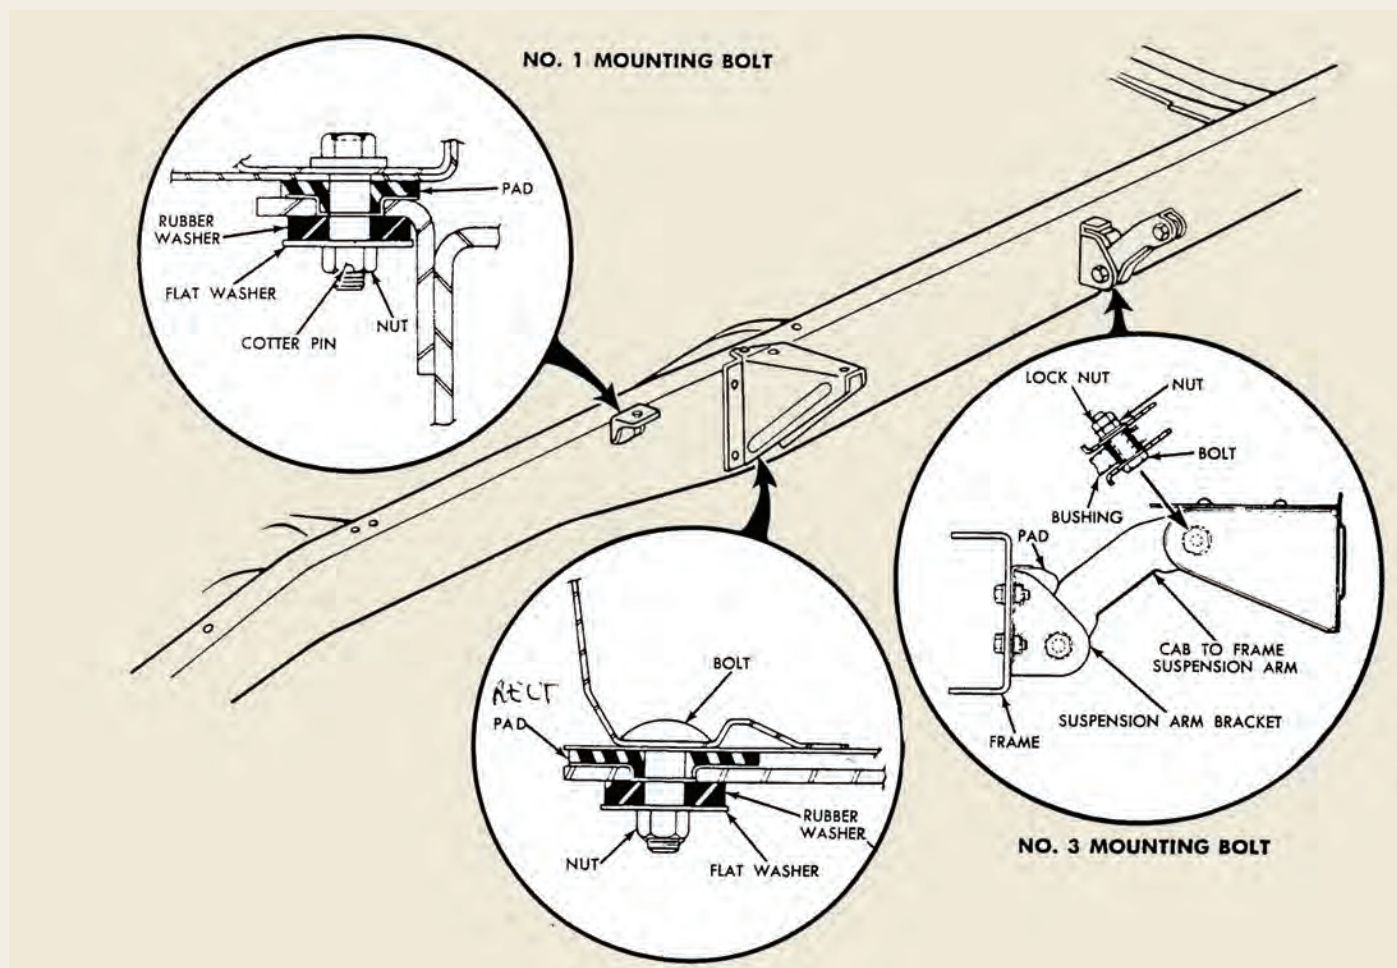

Before installing the cab assembly, check the condition of the suspension arm bushing at the suspension arm bracket. If the bushing has become soft or worn, it should be replaced.

Place the cab assembly in place on the frame. Shift the cab on the frame until the holes in the cab mounting brackets are aligned with the holes in the frame. Install the No.

3 mounting bolt bushings, bolts, square pads, rubber wahsers, flat washers, and nuts. Before tightening these nuts, make sure the mounting bolt nuts at the frame end of the suspension arms are tight. This should be done to prevent cocking the bushings.

Working under the cab, install the No. 2 cab to frame mounting bolts, square pads, rubber washers, flat washers, and nuts. Install the No. 1 cab to frame mounting bolt and lockwasher assemblies, square pads, rubber washers, flat washers, nuts, and cotter pin.

Install the fender splash pans. Connect the fuel line at the fuel tank. Install the transmission gear shift lever assembly. Install the steering gear column opening plates. Install the floor mat. Install the clutch and the brake pedal pads. Install the steering column bracket on the instrument panel. Install and connect all wiring, lines, and linkage that have been removed. Install the steering wheel.

FORD FLATHEAD CYLINDER HEADS

Original Edelbrock Design

Part #	8BA-6050-1115
Type	Finned Type
Note	24 Stud
Fits	Ford
Year	1948-53
Price	599.50 pr.

- Rugged, ribbed internally and externally, with a large water capacity and excellent breathing characteristics.

- Cast at the Edelbrock Foundry in the USA of T-6 tempered A356 aluminum.

- 8.0:1 compression ratio on blocks with a 3/16" base relief (stock bore and stroke)

- Compression ratio increase is approximately 3/10 of a percent with each 1/8" stroke.

HIGH LIFT / LARGE CHAMBER FORD FLATHEADS

Part #	8BA-6050-1116
Type	Finned Type
Note	24 Stud
Fits	Ford
Year	1948-53
Price	649.95 pr.

- Supports high lift cams & is perfect for reducing compression in supercharger applications or on low octane fuel

- Features new "raised roof" combustion chamber design that is CNC machined from our popular #1115 Flathead casting

- Increased valve clearance and increased flow for more power

TRIPLE DEUCE MANIFOLD

Part #	8BA-6520-1109
Year	1948-53
Price	329.95 ea.

- These reproductions of the vintage Edelbrock manifold #SU 359 and #SU 349 allow the use of three #94 carburetors on 1938-48 and 1949-53 Ford Flathead engines.

- #1109 features front road draft and 1 3/8" diameter oil fill bosses, and a raised fuel pump boss.

Our goal is to preserve Ford history for future generations.

Museum's Phase I displays Ford vehicles, artifacts, and memorabilia

The Early Ford V-8 Foundation was created in 1991 as a non-profit, educational organization dedicated to "Preserving 1932-1953 Early Ford V-8 History." This includes all related materials produced by the Ford Motor Company during this period, including cars and trucks. The Foundation currently has an 8,000 square foot building on 2.5 acres of land in Auburn, Indiana. This "Phase I" structure is being utilized as the Foundation's Museum for now, displaying our growing collection of Ford vehicles, artifacts and memorabilia. "Phase II" will be a 37,700 square foot building replicating the famous Ford Rotunda.

In the meantime, an ongoing effort is being made to seek out and acquire significant and important pieces of Ford history, including restoration of the original FORD Rotunda sign, for the education of future generations and to create an invaluable source of information for restorers and Ford V-8 historians.

Funding from membership dues, donations from concerned organizations and individuals are what fuels the progress of the Early Ford V-8 Foundation's vision. For only \$25.00 a year, you will become an Early Ford V-8 Foundation member and receive our informative, bi-monthly newsletter. Your donation is not only greatly appreciated but is essential to the success of our preservation program in keeping Ford history accessible for the education of future generations. As a 501 (c)(3) non-profit corporation, the Foundation offers tax benefits for donations of memorabilia and money to the Early Ford V-8 Foundation.

To learn more about our organization, our purpose, and our vision for the future, go to:

95% of our stamped metal parts are U.S.A. made.

scuff plates, tailgates, grilles, hub caps, bumpers, rocker panels and more

In the late 1970's my dad hired a couple of metal stamping tool and die makers, and we started making scuff plates and other stamped metal parts for restoring old Fords. In 1998 Ford granted us the honor to begin using the original Ford factory tooling, and we began stamping out tailgates, grilles, body moldings and more. We had to buy bigger presses to run these large tools and build more buildings to house everything. In 2002 Ford's supplier that made their hub caps went out of business, and we purchased six of the original presses from their production line, so that we could continue making hub caps from the original Ford tooling.

Today we have over 160 employees at our facility in Concord, NC, and we have 48 metal stamping presses ranging from 50 to 500 tons of stamping pressure. We have 3 roller mills that are used to make body moldings, bed strips, scuff plates and more. Our tool and die department is responsible for building new tools and for maintaining the older ones. The welding department assembles tailgates, grilles and various other metal parts that we make.

I am proud that we make quality parts in the USA, and I'm honored to carry on the business that my dad started.

We appreciate your business!

Daniel and Dennis Carpenter

Daniel Carpenter with company founder Dennis Carpenter

1955 Ford Car Scuff Plates

1967-72 F-100 Style Side Tailgates

1948-56 F-100 Stainless Steel Bumpers

This row of six 185 ton presses is used to stamp stainless steel sheets into Ford car hub caps.

Some scuff plates are made using progressive dies that perform 7 operations per 1 stamping cycle.

A 150 ton press is used to pierce the mounting holes in our stainless steel 1948-52 Ford truck front bumpers.

* Headline percentage is based on total sales of products made from Dennis Carpenter tooling and original Ford tooling.

These features make our V8 flathead water pumps better

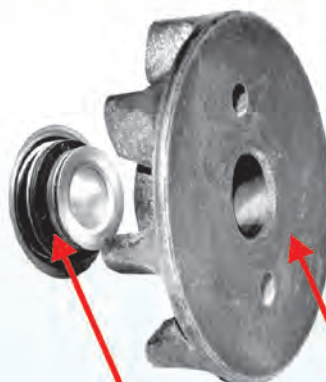

New Pump Housings

Our pump housings are new castings (not rebuilds) guaranteeing that there are no coolant-leaking stress cracks. Each housing's mounting surface is machined straight and true ensuring water-tight sealing when mounted to your flathead.

Double Row Sealed Ball Bearings

Original water pump impeller shafts relied on bronze bushings as bearings and were prone to premature wear. Our new pump shafts spin on double row ball bearings which extends pump life and decreases frictional heat.

Ceramic Seals

We've applied the advantages of modern technology to our pumps by introducing ceramic composition seals to the impeller shafts. Ceramic type seals are used in modern day water pumps and have a greater resistance to wear which significantly reduces the possibility of leakage and prolongs the life of the pumps.

Original impeller design creates inadequate coolant flow rate

Helical impeller design increases coolant flow rate

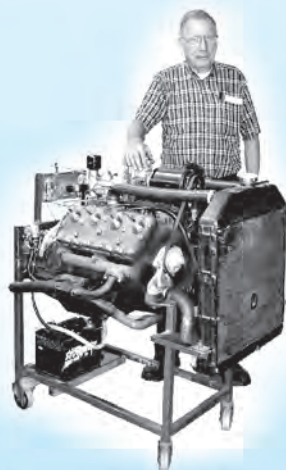

Helical Impellers

We've introduced the efficiency of helical impeller blades to our 1948-1952 water pumps. The angled arrangement of the impeller blades allows the coolant to flow faster through the radiator system at lower rpms. This results in a cooler running engine when operating at idle speed.

Runs 10° Cooler

An endurance test revealed that a V8 Ford flathead fitted with a pair of our better-flowing water pumps operated with a coolant temperature averaging 155° where as the same engine using stock pumps ran at approximately 165°. This proves that our water pumps produce lower coolant temperatures at idle speed than stock pumps and can ultimately prolong the life of your V8.

This 1940 85 h.p. flathead ran cool for 9 continuous hours for 3 consecutive days using new Dennis Carpenter V8 water pumps.

Water Pumps Engineered To Keep Your Flathead Running Cooler

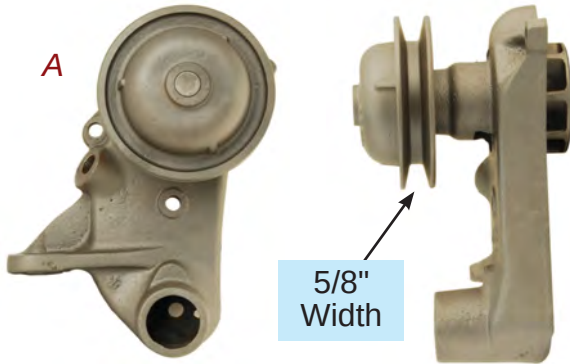

Install Dennis Carpenter water pumps on your classic Ford

WATER PUMPS - NEW

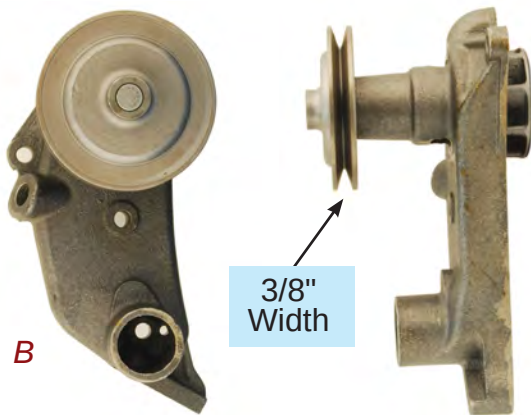

When ordering water pump, indicate width of belt at top (3/8" or 5/8") or width of pulley at top

Durable Zinc Chromate finish to resist corrosion

Performance Tested, Inspected & Certified

*There are two styles of air cleaners, one for trucks and one for cars. Your truck may have a car style Air Cleaner. Check your vehicle before ordering.

Features of our NEW 2-Barrel Carburetors

- Choke, foot throttle and hand throttle linkages are made to original specifications for quicker and easier installation.
- Proper power valves and jet settings (#50 metering jet) to deliver reliable performance for Ford flathead V8s (engines within 85-110 h.p. range)
- Zinc Chromate exterior coating for superior resistance to corrosion. The golden coloration replicates the finish of original Ford carburetors.
- 3 hole cast iron mounting flange with gasket

Every Carburetor is Assembled, Tested* & Calibrated at Dennis Carpenter Ford Restorations.

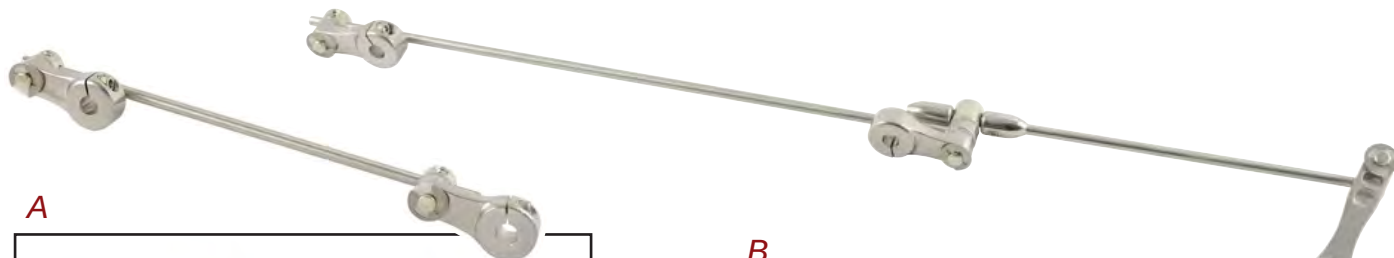

*Testing includes Carburetors run under simulated load for over 10 minutes.

FORD OWNER'S ASSOCIATION

FORD-BODIED FORD POWERED FORD PROVEN

This association welcomes all Fords! This is for the love and enjoyment of this great American product. What is better than owning a Ford? This is a family oriented association for all ages. Our goals are: 1) To unite individuals with diverse interests, with the common goal of enjoying their Ford vehicles under one association. 2) To serve as a common interest point of unity for members of all special interest clubs featuring Ford vehicles. 3) To provide a website with areas designated for both public and membership access to

share stories, pictures, and questions. 4) To sponsor a yearly event that will be held the same time and same place every year. 5) To provide opportunities for members to come together to enjoy these vehicles, while developing new friendships, and to concentrate on the goals of having fun and getting to know other people who enjoy their Fords. 6) To encourage people to bring their vehicles to an event that will offer display classes, which concentrate on cleanliness and workmanship.

1 Year Membership \$10.00
3 Year Membership \$25.00

Running Board Seal mounts into Cab Skirt Channel.

Stamping stainless steel into Ford truck bumpers

Made EXACTLY Like The Ford Originals!
How Dennis Carpenter makes bumpers for YOUR classic pickup

Our stainless steel 1953-56 front bumpers are made of 304 annealed steel which is the same thickness as a Ford original. Here the pieces are cut to the proper length by using a 75 ton press fitted with cutting dies.

The bumper shaping process begins as the steel is formed into a U channel shape. This view shows the 90 degree forming dies which are used to do the operation.

The U channel steel is then readied for the next stamping operation. Each piece is liberally coated with a special lubricant which allows the steel to be drawn more easily between the stamping dies.

Here you can see our 1953-1956 F100 front bumper being pulled form the forming dies. This HTC hydraulic press is capable of exerting 500 tons of pressure though only 240 tons of pressure is required to form the bumpers.

Though this press is now set up with the 1953-56 truck front bumper dies it is also used to make our 1948-56 rear bumpers, 1949 car scuff plates, 1966-77 Bronco rocker panels and 100's of other Dennis Carpenter Ford restoration parts.

This view shows the front bumper ready to receive it's final stamping process. This operation is responsible for cutting the bumper mounting bracket holes on the top and bottom edges of the bumpers. After this the stainless steel bumpers are sent out to be polished to a luxurious shine.

What you should know about Dennis Carpenter Weather Stripping.

(It's the last one you'll ever have to replace.)

Made Right, Fits Right, Lasts Longer

4140 Concord Parkway South Concord, North Carolina 28027 U.S.A. PH. 704.786.8139 800.476.9653 EMAIL: info@dennis-carpenter.com

1. WE MAKE IT.

**Designed, Engineered and
Manufactured by Dennis Carpenter.**

Our rubber extrusion department is capable manufacturing up to 35,000 feet daily of specially formulated EPDM rubber to make our quality windshield and rear window seals. We use the same machinery to extrude thousands of feet of soft sponge rubber which is an integral component of producing our door, roof rail and trunk seals. With over forty-five years of experience Dennis Carpenter is the leading manufacturer and distributor of superior quality Ford weatherstripping and molded rubber parts.

Over 99% of our Dennis Carpenter Weather Stripping is made right here in Concord, NC, USA. We are proud to be the largest manufacturer of Ford Restoration parts made in the United States.

2. IT'S THE VERY BEST.

**Why is Dennis Carpenter WEATHER STRIPPING
the absolute best on the market?**

Combine 45 plus years of manufacturing experience with 60 durometer E.P.D.M. dense rubber compound and you get a rear window seal that not only holds 50 lbs. of safety glass in place but better resists drying and shrinking from the sun's harmful ultraviolet rays.

At Dennis Carpenter Reproductions beginning with quality ingredients is the secret to making quality weather stripping products. Our attention to detail and quality control ensures that you're getting a premium product that is the absolute best on the market.

PREMIUM LINE
WEATHERSTRIPPING
by Dennis Carpenter

DC

PRO TECH TIP:

When installing windshield or back window rubbers apply soapy water to the rubber. This will help the rubber to slide along the glass as you adjust to a proper fit.

DC

PRO TECH TIP:

Dry fit door seals on the door to insure a good fit before applying glue.

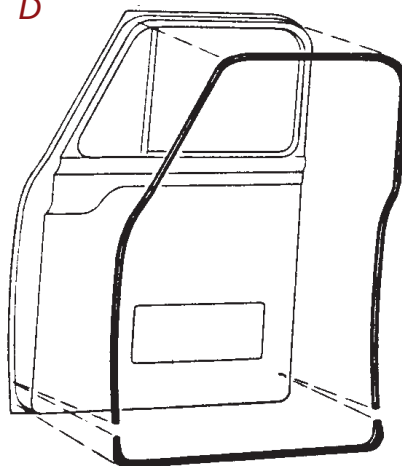

Our door seals are exact duplicates of the originals. No detail is left out. The kits consist of : front, top, back & bottom of door seals. The 1948-52 consists of special molded pieces for the front of door & for lower back side of door. All are bonded into one piece. The 1953-56 kits have special molded lower front and rear corners of each door. The 1956 kit also has the special "S" section for area where the door shuts against the windshield frame.

**Did you know there is a National Club
for Early Ford V-8 enthusiasts?**

Why not become a member?

Founded in San Leandro, California in 1963, the Early Ford V-8 Club of America recognizes all 1932-1953 Ford Motor Company vehicles including Ford, Lincoln, Mercury, Commercial vehicles, tractors, as well as other Ford powered vehicles built around the world including the 4, 6, 8, and 12-cylinder engines built by the Ford Motor Company.

Today, as the premier marquee club of our represented vehicles with a world-wide membership of over 11,000 and 125 active regional groups, we are dedicated to the restoration and preservation of all 1932 through 1953 Ford Motor Company vehicles.

The club's award winning bi-monthly magazine, the V-8 TIMES, is circulated all over the world and is acclaimed as one of the best car club magazine anywhere.

The V-8 TIMES features technical articles, shop tips, questions and answers to help with your restoration from a panel of experts, nostalgic and historical articles, club and regional

**Celebrating 1932-1953
Ford Vehicles**

group news, offerings of accessories and restoration manuals found nowhere else - plus classified ads on cars and parts.

Traditionally, the Early Ford V-8 Club of America has three National Meets hosted by regional group(s) in the eastern, central and west-

ern United States. These provide an excellent opportunity to see some great cars and network with those sharing your love of the 1932-1953 Fords.

Every five years, a Grand National Meet is held. Dearborn, the home of the Ford Motor Company, is usually the site of this meet. In 2008, the 45th Anniversary Meet was held there.

You'll find the most up-to-date information on the club and activities on the club's website. You can also participate in Forums and ask for help with your restorations.

You can also visit our online store for a variety of items including the club's outstanding restoration books highlighting certain model years.

A Snapshot of Dennis Carpenter and His Fords.

Growing up on a farm in Dover, Minnesota, Dennis Carpenter was raised with a strong work ethic and was taught early on how to use machinery and what made it work. Like many young guys he was fascinated with automobiles and by age 12 bought a 1941 Ford for \$12.00. It seemed that first car established an allegiance to Fords that Dennis would carry with him for the rest of his life.

Dennis' passion for Fords and making the parts to restore them has been the driving force at his company since 1970. From the rubber extrusion department comes Premium Line Weather Stripping products. From the stamping and injection dies comes a dynamic variety of Officially Licensed Ford and Original Ford Tooling parts. Passion can be described as "implied energetic and unflinching pursuit of an aim."

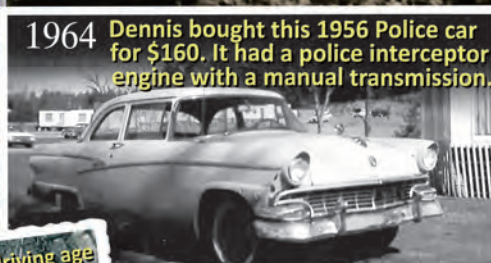

Dennis Carpenter's passion is to develop, engineer, and produce superior Ford restoration parts.

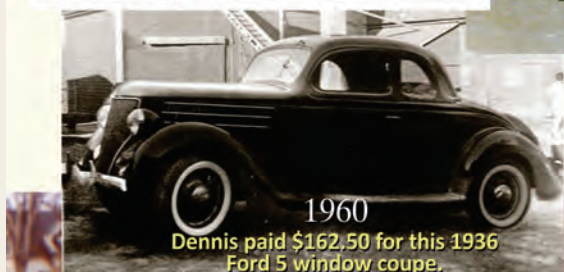

1962
Dennis with his new 1962 Galaxie. Base price was \$3,033.00. He added a push button radio for \$58.50

1960
Dennis in uniform.

1964 Dennis bought this 1956 Police car for \$160. It had a police interceptor engine with a manual transmission.

1960
Dennis paid \$162.50 for this 1936 Ford 5 window coupe.

When Dennis became legal driving age he paid \$600.00 for this 1956 Mercury that also included a new set of tires. He later installed a 1956 Y Block and a manual transmission with overdrive.

1956

1961
Dennis' first Galaxie was a beautiful 1961 convertible.

1960
Dennis on Army leave with his 1957 convertible.

CLASSIC PARTS

from ORIGINAL FORD TOOLING

Original Ford Tooling refers to the obsolete stamping dies, plastic injection molds, roller dies and other tooling that Ford Motor Company once used for mass production of it's parts. Dennis Carpenter Ford Restoration Parts is the first member of a select group of manufacturers permitted by Ford to use their obsolete tooling to make reproduction parts for today's restoration part industrey.

1953-72 Tailgate. Stamped in U.S.A. from original Ford tooling. Assembled at Carpenter Industries in Concord, NC.

An original Ford welding fixture is used to secure each tailgate skin as they are prepared for assembly. A suspended spot welding machine similar to those used on the Ford assembly line is used to weld the tailgates together.

HOW WE MAKE BED STRIPS

We manufacture our high quality Bed Strips right here in Concord, North Carolina. These USA made strips are created on our in-house Roller Mill using the best in raw materials. The Roller Mill uses 7 different roller dies to mold and conform the raw metal into an exact of original Bed Strip.

BED STRIP & BED SIDE BOLT KIT

All nuts and washers are zinc plated.
Includes placement instructions.

Restore YOUR FORD

www.dennis-carpenter.com

Daniel Carpenter and company founder Dennis Carpenter

We are honored and very thankful to Ford for allowing us to save many of the original Ford factory tools from the scrap pile. With these original factory tools we are able to continue serving restorers like you with quality parts that have the original factory fit and finish and are made in the USA.

In 1998 we started bringing these original tools to our facility. We soon realized that we needed to buy bigger presses to run these large tools and needed to build more buildings to house everything. For example, in 2002 we learned that Ford's supplier that had made their hub caps since the 1950's was going out of business. We purchased six of the

original presses from their production line, so that we could continue making hub caps from the original Ford tooling. With the future in mind, we continue bringing in more original tools that Ford has quit using for 1970-1990's pickup truck parts.

When you see the above symbol on a part, rest assured that it will have the factory fit and finish and it was proudly made in the USA.

We appreciate your business!

Daniel and Dennis Carpenter

1957 Ford Car Hub Caps

1973-79 F-100 Interior Door Panels

Bronco and F-100 Tailgates

Welding original Ford tooling 1966-77 Bronco tailgates.

Thousands of original Ford tools are stored in several warehouses at the Carpenter facility.

This press is fitted with a 3-stage progressive stamping die that makes 1977-79 F-100 race-track moldings.

* Headline derived from the fact that all leased Ford tooling remains in the USA.

In 1908 Henry Ford created the Ford Times magazine. Originally it was a magazine focused on keeping the Ford customer and dealers informed on all things Ford related.

It quickly grew to become more of a reader's digest type publication that added articles about travel, history and even recipes in addition to it's articles and updates on Ford products. In the 50's and 60's it added features on many watercolor paintings of the time.

The magazine began in a larger format but Henry Ford liked the idea of being able to fit the magazine into his pocket so he had the size reduced to 4x6.

Ford Times magazine had an incredible run being published from 1908 until 1996 and are still highly collectible today. Get your small piece of Ford history today. Collectors and Ford enthusiasts alike will enjoy and appreciate a copy of Ford Times Magazine!

- Published from 1908 until 1996.
- Highly collectible
- Vol 1. (1908) set recently sold for almost \$2,000
- Pocket sized so Henry Ford could carry them easily.
- Features Ford information, travel and historical stories.
- 1950's & 60's editions featured watercolor paintings.

Many more years through 1972 are available online.
Check dennis-carpenter.com for details.

MAKE YOUR WINDOWS WORK AND LOOK LIKE NEW!

The door windows on your Ford pickup will seal tighter, operate smoother and look better when you install a complete WINDOW ANTI-RATTLER KIT authentically reproduced by Dennis Carpenter. For a step-by-step photo demonstration, Emerson Duke volunteered his 1950 pickup. Our Jim Lentz performed the project. [kit for two doors is #7C-8121460-CA, model years 1948-52. Kits available for years 1953-56. Includes division bar assembly, door glass runs, and "Fuzzy" anti-rattlers. Vent Window rubber seals, part #7C-812448-PR are a separate purchase, as are door seals, part #8C-8120530-PR.

Loosely unscrew the division bar to facilitate the removal of the window regulator arm. Remove door glass run around window opening in door.

Remove all door handles and mechanism. Remove cover to access opening. Unscrew door latch mech. Helper holds window while removing screws

Disengage window from regulator arm. Rest in bottom of door. Unscrew window regulator arm and remove through opening.

Now carefully remove door glass from door through access opening.

Unscrew and remove division bar through opening.

Unscrew and remove vent window assembly. If desired, repaint the assembly with a fast-drying pain before continuing.

On bench, shape new door glass run to correct curve by fitting over door window. Note that position of clip on reverse side of run matches to slot in door.

Install new glass run making sure clip in reverse side of run is secured in slot in door. "Fuzzy" anti-rattlers can be installed at this point.

On bench, install vent window rubber. A light spray of silicone will facilitate the installation.

When installed, rubber seal will fit loosely. Pressure of tightening will adjust the fit. Re-install door parts in reverse order beginning with division bar.

FLAT RATE SHIPPING

ON ALL DOMESTIC GROUND ORDERS*

*RESTRICTIONS APPLY. SEE ADDITIONAL DETAILS BELOW

\$99 or LESS get \$9.99 SHIPPING
\$100 or MORE get \$14.99 SHIPPING

Must ship by "ground" service within the contiguous US. This excludes Alaska, Hawaii, and Puerto Rico. Normal carrier rates apply.

Domestic Air and International service is not included. Normal carrier rates apply. Even though an order requires multiple packages or if any of the packages are oversized, bulky, and/or heavy, the shipping is still \$14.99 excluding items that require "Freight Truck Shipping". Any "domestic ground" order with a total parts value under \$100.00 will be charged a \$9.99 minimum shipping rate. These rates include insurance and handling.

Items such as hoods, bedsides, 12' bedstrips, doors, fenders, quarter panels require freight truck shipping. Items that require freight truck shipping are noted in catalog. If items requiring freight truck shipping are ordered with flat rate items, all items will be included for the same freight truck rate. See right for more details.

Preferred Carriers

Our preferred carriers are FedEx, UPS, and USPS for all parcel shipments. No other carriers are used. No exceptions.

FedEx

Special Handling:

Retail orders requiring special handling other than flat rate ground shipping will be estimated as shown below: The prices are estimates only. Actual shipping charges will apply.

Air Shipments

	Sm. Pkg.	Med. Pkg.	Lg. Pkg.
Next Day Air:	\$40.00	\$100.00	\$200.00
Sec. Day Air:	\$30.00	\$75.00	\$170.00

Freight Truck Shipment

	Shipping Fee	Crating Fee if applicable
Residential Address	\$150.00	\$75.00
Commercial Address	\$150.00**	\$75.00

**Lift Gate Fees are included in estimates above and range from \$30 to \$40. Depending on carrier this fee may be waived for orders delivered to a commercial address.

Freight Truck Shipping fees above are estimates only. Actual freight shipping charges will be applied when the order is shipped and invoiced. Items that require a freight truck cannot be included with flat rate shipping.

International Shipments All Except Canada

When calculating shipping for international orders, please use 50% of the order total parts value or \$50.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. International orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Canadian Shipments

When calculating shipping for Canadian orders, please use 20% of the order total parts value or \$25.00, whichever is greater. These figures are used for estimating purposes only. The actual amount will be added when the order is shipped and invoiced. Canadian orders are shipped by the USPS most of the time, size and weight permitting. Customs clearance will be the responsibility of the consignee.

Merchandise Returns:

- 1 All sales are considered final with the exception of warranty claims and merchandise shipped in error.
- 2 All returned merchandise must be in original packaging and is subject to inspection and approval prior to credit or exchange. Must be in new sale condition as determined by Carpenter Industries.

It is the customer's responsibility to check parts for correct fit BEFORE installation.

Any part that has been installed, disassembled, drilled, welded, cut, painted, or modified in any way, or is missing kit components is NOT eligible for return.

Electrical items that have NOT been installed and/or plugged in are eligible for return.

Electrical items that are authorized for return are still subject to inspection and approval prior to credit and/or exchange.

No returns accepted on any literature.

Any installation, disassembly or modification by a third party on the behalf of customer does not constitute an exception to our policy. Purchaser retains full responsibility for the condition of the part.

- 3 Returns within 30 days of invoice date are acceptable, any returns received after 30 days are subject to a 20% restocking fee. Returns after 180 days are subject to a 50% restocking fee.
- 4 **Absolutely NO returns accepted after one year from date of purchase. No exceptions.**
- 5 ALL RETURNS MUST HAVE A RETURN AUTHORIZATION RA NUMBER. Please call 1-800-476-9653, option 2, to obtain an RA number. Please have your purchase invoice number available when calling. C.I. is NOT responsible for unauthorized returns.
- 6 All returns must be shipped "pre-paid" and fully insured. COD or collect returns will not be accepted. In cases where a return is due to our error, "pre-paid" shipping charges will be refunded.
- 7 Refunds will be issued based upon the method of payment. i.e. cash for cash purchases, credit on a credit card for credit card purchases, etc.. On returns due to our error, your shipping expense will be reimbursed based only upon carriers charges.
- 8 All returns should be sent to: Carpenter Industries, Inc.
4140 Concord Parkway S
Concord NC 28027

Claims:

All claims must be taken up with Dennis Carpenter Restorations.

Please inspect all orders for damage and/or errors immediately upon receipt. Report all discrepancies to Carpenter Industries at 1-800-476-9653, option 2, within 7 days of receipt. No claims accepted after 7 days.

Please hold all original boxes and packaging materials for the carrier to inspect.

Warranty

We guarantee to replace or at our option, repair any product or parts which are found to be defective in material or workmanship within one year from the date of shipment. Our obligation with respect to such products or parts shall be limited to replacement or repair and in no event shall we be liable for consequential or special damages, or for transportation, installation, adjustment, or other expenses which may arise in connection with such products or parts. THIS WARRANTY EXPRESSLY MADE IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

Dennis Carpenter Ford Restoration designs, engineers and manufactures it's own brand of quality Weather Stripping, 99% of which is made here in Concord, NC in our Rubber Extrusion department.

• **Back Window Rubber** • **Trunk Rubber** • **Vent Window Seals** • **Windshield Rubber** • **Door Seals**

4140 Concord Parkway So.
Concord NC 28027

**Competitor
Brand**

- **Made kinda like original**
- **Cheap Materials**
- **Cracks and fades**

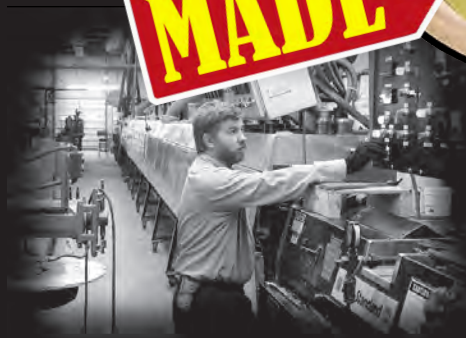

After 6 months
outside in the sun.

**Carpenter
Brand**

- **Exact fit and mold**
- **Made exact of original**
- **Quality Materials**
- **Long Lasting**

PREMIUM_{LINE}
WEATHERSTRIPPING
by Dennis Carpenter

With over forty-five years of experience Dennis Carpenter is the leading manufacturer and distributor of superior quality Ford weatherstripping and molded rubber parts. Our rubber extrusion department is capable of manufacturing 25,000 feet of specially formulated EPDM rubber to make our quality windshield and rear window seals.

Made Right, Fits Right, Lasts Longer

4140 Concord Parkway South Concord, North Carolina 28027 U.S.A. PH. 704.786.8139 800.476.9653 EMAIL: info@dennis-carpenter.com

Vent Window Seals after 6 months in our testing labratory (ie. Outside exposed to the elements)
